

MUFG Japan Small Cap Active ETF
(NYSE Arca – MJSC)

of The RBB Fund Trust

Statement of Additional Information

Dated July 2, 2025

The MUFG Japan Small Cap Active ETF (the “Fund”) is a diversified series of The RBB Fund Trust (the “Trust”), an open-end management investment company organized as a Delaware statutory trust on August 29, 2014.

Clearbrook Investment Consulting, LLC (the “Adviser”) serves as the investment adviser to the Fund, Mitsubishi UFJ Trust and Banking Corporation (the “Sub-Adviser”) serves as the investment sub-adviser to the Fund, and Exchange Traded Concepts, LLC (“Trading Adviser”) serves as the trading adviser to the Fund.

Information about the Fund is set forth in the prospectus dated July 2, 2025 (the “Prospectus”), and provides the basic information you should know before investing. To obtain a copy of the Prospectus and/or the Fund’s Annual and Semi-Annual Reports, once available, please visit www.mufgetf.com or call 1-800-617-0004. This Statement of Additional Information (“SAI”) is not a prospectus but contains information in addition to and more detailed than that set forth in the Prospectus. It is incorporated by reference in its entirety into the Prospectus. This SAI is intended to provide you with additional information regarding the activities and operations of the Fund and the Trust, and it should be read in conjunction with the Prospectus. Capitalized terms not otherwise defined herein have the same meaning set forth in the Prospectus.

FUND HISTORY

The RBB Fund Trust (the “Trust”) is an open-end management investment company organized as a Delaware statutory trust on August 29, 2014. The Trust’s Amended and Restated Agreement and Declaration of Trust permits the Trust to offer separate series of shares of beneficial interest (each of which is a separate mutual fund) and separate classes of such series. Upon liquidation, shareholders of a series of the Trust are entitled to share pro rata in the net assets of such series available for distribution to shareholders. Expenses attributable to any series of the Trust are borne by that series.

The Trust is authorized to issue an unlimited number of interests (or shares) with no par value. Shares of each series have equal voting rights, and are voted in the aggregate and not by the series except in matters where a separate vote is required by the Investment Company Act of 1940, as amended (the “1940 Act”), or when the matter affects only the interest of a particular series. The Trust’s series may hold special meetings of shareholders to elect or remove Trustees of the Trust, change fundamental policies, approve a management contract, or for other purposes. The Trust’s series will mail proxy materials in advance of a shareholder meeting, including a proxy and information about the proposals to be voted on. When matters are submitted to shareholders for a vote, each shareholder is entitled to one vote for each full share owned and fractional votes for fractional shares owned. Fund shares do not have cumulative voting rights or any preemptive or conversion rights. The Trust does not normally hold annual meetings of shareholders. This SAI pertains to the shares representing interests in the Fund.

The investment objective of the Fund is long-term capital appreciation.

The Fund offers and issues shares at its net asset value per share (“NAV”) only in aggregations of a specified number of shares (each a “Creation Unit”). The Fund also generally offers and issues shares in exchange for a basket of securities (“Deposit Securities”) together with the deposit of a specified cash payment (“Cash Component”). The Trust reserves the right to permit or require the substitution of a “cash in lieu” amount (“Deposit Cash”) to be added to the Cash Component to replace any Deposit Security. The shares of the Fund are listed on NYSE Arca, Inc. (the “Exchange”) and trade on the Exchange at market prices. These prices may differ from the share’s NAV. The shares are also redeemable only in Creation Unit aggregations, and generally in exchange for portfolio securities and a specified cash payment. A Creation Unit of the Fund generally consists of at least 10,000 Shares.

Shares of the Fund may be issued in advance of receipt of Deposit Securities subject to various conditions including a requirement to maintain on deposit with the Trust cash at least equal to a specified percentage of the market value of the missing Deposit Securities as set forth in the Participant Agreement (as defined below). The Trust may impose a transaction fee for each creation or redemption (the “Transaction Fee”). In all cases, such fees will be limited in accordance with the requirements of the Securities and Exchange Commission (the “SEC”) applicable to management investment companies offering redeemable securities. The Fund may charge, either in lieu or in addition to the fixed creation or redemption Transaction Fee, a variable fee for creations and redemptions in order to cover certain brokerage, tax, foreign exchange, execution, market impact and other costs and expenses related to the execution of trades resulting from such transaction, up to a maximum of 2.00% of the NAV per Creation Unit, inclusive of any Transaction Fees charged (if applicable).

The Fund is an actively-managed exchange-traded fund (“ETF”).

INVESTMENT POLICIES AND PRACTICES

The Fund’s investment objective and principal investment strategies are described in the Prospectus. The sections below describe some of the different types of investments that may be made by the Fund as part of its principal and non-principal investment strategies. The following information supplements, and should be read in conjunction with, the Prospectus.

With respect to the Fund’s investments, unless otherwise noted, if a percentage limitation on investment is adhered to at the time of investment or contract, a subsequent increase or decrease as a result of market movement or redemption will not result in a violation of such investment limitation. To the extent an investment with respect to the Fund is discussed in this SAI but not in the Prospectus, such policy is not a principal investment of the Fund.

There can be no guarantee that the Fund will achieve its investment objective. The Fund may not necessarily invest in all of the instruments or use all of the investment techniques permitted by the Prospectus and this SAI, or invest in such instruments or engage in such techniques to the full extent permitted by the Fund's investment policies and limitations.

Principal Investment Policies and Risks

Cyber Security Risk. The Fund and its service providers may be prone to operational and information security risks resulting from breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption, or lose operational capacity. Breaches in cyber security include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber-attacks. Cyber security breaches affecting the Fund, Adviser, Sub-Adviser, Trading Adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact the Fund. For instance, cyber security breaches may interfere with the processing of shareholder transactions, impact the Fund's ability to calculate its NAV, cause the release of private shareholder information or confidential business information, impede trading, subject the Fund to regulatory fines or financial losses and/or cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for issuers of securities in which the Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund's investment in such companies to lose value. While the Fund and its service providers have established information technology and data security programs and have in place business continuity plans and other systems designed to prevent losses and mitigate cyber security risk, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified or that cyber-attacks may be highly sophisticated. Furthermore, the Fund has limited ability to prevent or mitigate cyber security incidents affecting third-party service providers, and such third-party service providers may have limited indemnification obligations to the Fund, the Adviser, the Sub-Adviser or the Trading Adviser.

Emerging Countries Risk. The Fund may invest in securities of issuers located in emerging countries. The securities markets of emerging countries are less liquid and subject to greater price volatility, and have a smaller market capitalization, than the U.S. securities markets. In certain countries, there may be fewer publicly traded securities and the market may be dominated by a few issues or sectors. Issuers and securities markets in such countries are not subject to as extensive and frequent accounting, financial and other reporting requirements or as comprehensive government regulations as are issuers and securities markets in the U.S. In particular, the assets and profits appearing on the financial statements of emerging country issuers may not reflect their financial position or results of operations in the same manner as financial statements for U.S. issuers. Substantially less information may be publicly available about emerging country issuers than is available about issuers in the United States.

Emerging country securities markets are typically marked by a high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries, as well as a high concentration of ownership of such securities by a limited number of investors. The markets for securities in certain emerging countries are in the earliest stages of their development. Even the markets for relatively widely traded securities in emerging countries may not be able to absorb, without price disruptions, a significant increase in trading volume or trades of a size customarily undertaken by institutional investors in the securities markets of developed countries. The limited size of many of these securities markets can cause prices to be erratic for reasons apart from factors that affect the soundness and competitiveness of the securities issuers. For example, prices may be unduly influenced by traders who control large positions in these markets. Additionally, market making and arbitrage activities are generally less extensive in such markets, which may contribute to increased volatility and reduced liquidity of such markets. The limited liquidity of emerging country securities may also affect the Fund's ability to accurately value its portfolio securities or to acquire or dispose of securities at the price and time it wishes to do so or in order to meet redemption requests.

With respect to investments in certain emerging market countries, antiquated legal systems may have an adverse impact on the Fund. For example, while the potential liability of a shareholder in a U.S. corporation with respect to acts of the corporation is generally limited to the amount of the shareholder's investment, the notion of limited liability is less clear in certain emerging market countries. Similarly, the rights of investors in emerging market companies may be more limited than those of shareholders in U.S. corporations, the legal remedies for investors in emerging markets may be more limited than the remedies available in the U.S. and the ability of U.S. authorities (e.g., SEC and the U.S. Department of Justice) to bring actions against bad actors may be limited.

Transaction costs, including brokerage commissions or dealer mark-ups, in emerging countries may be higher than in the United States and other developed securities markets. In addition, existing laws and regulations are often inconsistently applied. As legal systems in emerging countries develop, foreign investors may be adversely affected by new or amended laws and regulations. In circumstances where adequate laws exist, it may not be possible to obtain swift and equitable enforcement of the law.

Foreign investment in the securities markets of certain emerging countries is restricted or controlled to varying degrees. These restrictions may limit the Fund's investment in certain emerging countries and may increase the expenses of the Fund. Certain emerging countries require governmental approval prior to investments by foreign persons or limit investment by foreign persons to only a specified percentage of an issuer's outstanding securities or a specific class of securities which may have less advantageous terms (including price) than securities of the company available for purchase by nationals. In addition, the repatriation of both investment income and capital from emerging countries may be subject to restrictions which require governmental consents or prohibit repatriation entirely for a period of time. Even where there is no outright restriction on repatriation of capital, the mechanics of repatriation may affect certain aspects of the operation of the Fund. The Fund may be required to establish special custodial or other arrangements before investing in certain emerging countries.

Emerging countries may be subject to a substantially greater degree of economic, political and social instability and disruption than is the case in the United States, Japan and most Western European countries. This instability may result from, among other things, the following: (i) authoritarian governments or military involvement in political and economic decision making, including changes or attempted changes in governments through extra-constitutional means; (ii) popular unrest associated with demands for improved political, economic or social conditions; (iii) internal insurgencies; (iv) hostile relations with neighboring countries; (v) ethnic, religious and racial disaffection or conflict; and (vi) the absence of developed legal structures governing foreign private investments and private property. Such economic, political and social instability could disrupt the principal financial markets in which the Fund may invest and adversely affect the value of the Fund's assets. The Fund's investments can also be adversely affected by any increase in taxes or by political, economic or diplomatic developments.

The economies of emerging countries may differ unfavorably from the U.S. economy in such respects as growth of gross domestic product, rate of inflation, capital reinvestment, resources, self-sufficiency and balance of payments. Many emerging countries have experienced in the past, and continue to experience, high rates of inflation. In certain countries inflation has at times accelerated rapidly to hyperinflationary levels, creating a negative interest rate environment and sharply eroding the value of outstanding financial assets in those countries. Other emerging countries, on the other hand, have experienced deflationary pressures and are in economic recessions. The economies of many emerging countries are heavily dependent upon international trade and are accordingly affected by protective trade barriers and the economic conditions of their trading partners. In addition, the economies of some emerging countries are vulnerable to weakness in world prices for their commodity exports. The Fund's income and, in some cases, capital gains from foreign stocks and securities will be subject to applicable taxation in certain of the countries in which it invests, and treaties between the U.S. and such countries may not be available in some cases to reduce the otherwise applicable tax rates.

Equity Securities. Equity securities represent ownership interests in a company and consist of common stocks, preferred stocks, warrants to acquire common stock, and securities convertible into common stock. Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time. Fluctuations in the value of equity securities in which the Fund invests will cause the NAV of the Fund to fluctuate. The Fund purchases equity securities traded in the U.S. and abroad on registered exchanges or the over-the-counter market. Equity securities are described in more detail below:

Common Stock. Common stock represents an equity or ownership interest in an issuer. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.

Preferred Stock. Preferred stock represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock.

Convertible Securities. Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. A convertible security may also be called for redemption or conversion by the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by the Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying common stock, or sell it to a third party.

Convertible securities generally have less potential for gain or loss than common stocks. Convertible securities generally provide yields higher than the underlying common stocks, but generally lower than comparable non-convertible securities. Because of this higher yield, convertible securities generally sell at a price above their “conversion value,” which is the current market value of the stock to be received upon conversion. The difference between this conversion value and the price of convertible securities will vary over time depending on changes in the value of the underlying common stocks and interest rates. When the underlying common stocks decline in value, convertible securities will tend not to decline to the same extent because of the interest or dividend payments and the repayment of principal at maturity for certain types of convertible securities. However, securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities convertible at the option of the holder. When the underlying common stocks rise in value, the value of convertible securities may also be expected to increase. At the same time, however, the difference between the market value of convertible securities and their conversion value will narrow, which means that the value of convertible securities will generally not increase to the same extent as the value of the underlying common stocks. Because convertible securities may also be interest-rate sensitive, their value may increase as interest rates fall and decrease as interest rates rise. Convertible securities are also subject to credit risk, and are often lower-quality securities.

Small Capitalization Companies. Investing in equity securities of small capitalization companies often involves greater risk than is customarily associated with investments in larger capitalization companies. This increased risk may be due to the greater business risks of smaller size, limited markets and financial resources, narrow product lines and frequent lack of depth of management. The securities of smaller companies are often traded in the over-the-counter market and even if listed on a national securities exchange may not be traded in volumes typical for that exchange. Consequently, the securities of smaller companies are less likely to be liquid, may have limited market stability, and may be subject to more abrupt or erratic market movements than securities of larger, more established companies or the market averages in general.

Exchange-Traded Funds. The Fund may hold shares of other open-end investment companies whose shares are listed for trading on a national securities exchange. ETF shares typically trade like shares of common stock and provide investment results that generally correspond to the price and yield performance of the component stocks of a widely recognized index. There can be no assurance, however, that this can be accomplished, as it may not be possible for an ETF to replicate the composition and relative weightings of the securities of its corresponding index. Additionally, some ETFs are actively-managed by an investment adviser and/or sub-advisers and do not seek to provide investment results that correspond to an index.

ETFs are subject to risks of an investment in a broadly based portfolio of common stocks, including the risk that the general level of stock prices may decline, thereby adversely affecting the value of such investment. An actively-managed ETF may not perform as well as its investment adviser and/or sub-advisers expect, and/or the actively-managed ETF's portfolio management practices might not work to achieve the desired result. Individual shares of an ETF are generally not redeemable at their NAV, but trade on an exchange during the day at prices that are normally close to, but not the same as, their NAV. There is no assurance that an active trading market will be maintained for the shares of an ETF or that market prices of the shares of an ETF will be close to their NAVs. The existence of extreme market volatility or potential lack of an active trading market for an ETF's shares could result in such shares trading at a significant premium or discount to their NAV. In addition, the purchase of shares of ETFs may result in duplication of expenses, including advisory fees, in addition to a mutual fund's or ETF's own expenses.

Investments in securities of ETFs beyond the limitations set forth in Section 12(d)(1)(A) of the 1940 Act are subject to certain terms and conditions described below. Section 12(d)(1)(A) states that a mutual fund may not acquire shares of other investment companies, such as ETFs, in excess of: 3% of the total outstanding voting stock of the investment company; 5% of its total assets invested in the investment company; or more than 10% of the fund's total assets were to be invested in the aggregate in all investment companies. The purchase of shares of ETFs may result in duplication of expenses, including advisory fees, in addition to a mutual fund's own expenses. Rule 12d1-4 under the 1940 Act ("Rule 12d1-4") allows funds to invest in other investment companies in excess of some of the limitations discussed above, subject to certain limitations and conditions. An acquiring fund relying on Rule 12d-4 must enter into a fund of funds investment agreement with the acquired fund. Rule 12d1-4 outlines the requirements for fund of funds agreements and specifies certain reporting responsibilities of the acquiring fund's adviser. The Fund expects to rely on Rule 12d1-4 to the extent the Adviser deems such reliance necessary or appropriate.

Foreign Custody Risk. The Fund may hold foreign securities and cash with foreign banks, agents, and securities depositories appointed by the Fund's custodian (each a "Foreign Custodian"). Some Foreign Custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over or independent evaluation of their operations. Further, the laws of certain countries may place limitations on the Fund's ability to recover its assets if a Foreign Custodian enters bankruptcy. Investments in emerging markets may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often undeveloped and may be considerably less well-regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.

Foreign Securities Risk. The Fund may invest in securities of foreign issuers either directly or through American Depositary Receipts ("ADRs") Global Depositary Receipts ("GDRs"), European Depositary Receipts ("EDRs") or International Depositary Receipts ("IDRs"). ADRs are securities, typically issued by a U.S. financial institution (a "depository"), that evidence ownership interests in a security or pool of securities issued by a foreign issuer and deposited with the depository. ADRs may be listed on a national securities exchange or may trade in the over-the-counter market. ADR prices are denominated in U.S. dollars; the underlying security may be denominated in a foreign currency. GDRs, EDRs and IDRs are securities that represent ownership interests in a security or pool of securities issued by a non-U.S. or U.S. corporation. Depositary receipts may be available through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the security underlying the receipt and the depository, whereas an unsponsored facility is established by the depository without participation by the issuer of the underlying security. Holders of unsponsored depositary receipts generally bear all of the costs of the unsponsored facility. The depository of an unsponsored facility is frequently under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through, to the holders of the receipts, voting rights with respect to the deposited securities. The depository of unsponsored depositary receipts may provide less information to receipt holders. Investments in depositary receipts do not eliminate the risks in investing in foreign issuers. The underlying security may be subject to foreign government taxes, which would reduce the yield on such securities.

Investments in foreign securities involve higher costs than investments in U.S. securities, including higher transaction costs as well as the imposition of additional taxes by foreign governments. In addition, foreign investments may include additional risks associated with more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which the Fund invests. Volume and liquidity in most foreign bond markets are less than in the United States and, at times, volatility or price can be greater than in the United States. Future political and economic information, the possible imposition of withholding taxes on interest income, the possible seizure or nationalization of foreign holdings, the possible establishment of exchange controls, or the adoption of other governmental restrictions, might adversely affect the payment of principal and interest on foreign obligations. Inability to dispose of Fund securities due to settlement problems could result either in losses to the Fund due to subsequent declines in value of the securities, or, if the Fund has entered into a contract to sell the securities, could result in possible liability to the purchaser. Individual foreign economies may differ favorably or unfavorably from the U.S. economy in such respects as growth or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position.

Fixed commissions on foreign securities exchanges are generally higher than negotiated commissions on U.S. exchanges, although the Fund endeavors to achieve the most favorable net results on their portfolio transactions. There is generally less government supervision and regulation of securities exchanges, brokers, dealers and listed companies than in the United States.

Settlement mechanics (e.g., mail service between the United States and foreign countries) may be slower or less reliable than within the United States, thus increasing the risk of delayed settlements of portfolio transactions or loss of certificates for portfolio securities. Foreign markets also have different clearance and settlement procedures, and in certain markets there have been times when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct such transactions. Such delays in settlement could result in temporary periods when a portion of the assets of the Fund is uninvested and no return is earned thereon. The inability of the Fund to make intended security purchases due to settlement problems could cause the Fund to miss attractive investment opportunities.

Although the Fund may invest in securities denominated in foreign currencies, the Fund values its securities and other assets in U.S. dollars. As a result, the NAV of the Fund's shares may fluctuate with U.S. dollar exchange rates as well as the price changes of the Fund's securities in the various local markets and currencies. Thus, an increase in the value of the U.S. dollar compared to the currencies in which the Fund makes its investments could reduce the effect of increases and magnify the effect of decreases in the price of the Fund's securities in their local markets. Conversely, a decrease in the value of the U.S. dollar may have the opposite effect of magnifying the effect of increases and reducing the effect of decreases in the prices of the Fund's securities in its foreign markets. In addition to favorable and unfavorable currency exchange rate developments, the Fund is subject to the possible imposition of exchange control regulations or freezes on convertibility of currency.

The Fund may invest in obligations of foreign branches of U.S. banks (Eurodollars) and U.S. branches of foreign banks (Yankee dollars) as well as foreign branches of foreign banks. These investments involve risks that are different from investments in securities of U.S. banks, including potential unfavorable political and economic developments, different tax provisions, seizure of foreign deposits, currency controls, interest limitations or other governmental restrictions which might affect payment of principal or interest. The Fund may also invest in Yankee bonds, which are issued by foreign governments and their agencies and foreign corporations, but pay interest in U.S. dollars and are typically issued in the United States.

Recently, various countries have seen significant internal conflicts and in some cases, civil wars may have had an adverse impact on the securities markets of the countries concerned. In addition, the occurrence of new disturbances due to acts of war or terrorism or other political developments cannot be excluded. Nationalization, expropriation or confiscatory taxation, currency blockage, political changes, government regulation, political, regulatory or social instability or uncertainty or diplomatic developments, including the imposition of sanctions or other similar measures, could adversely affect the Fund's investments.

Recent examples of the above include conflict, loss of life and disaster connected to ongoing armed conflict between Russia and Ukraine in Europe and Hamas and Israel in the Middle East. The extent, duration and impact of these conflicts, related sanctions and retaliatory actions are difficult to ascertain, but could be significant and have severe adverse effects on the region, including significant adverse effects on the regional or global economies and the markets for certain securities and commodities. These impacts could negatively affect the Fund's investments in securities and instruments that are economically tied to the applicable region, and include (but are not limited to) declines in value and reductions in liquidity. In addition, to the extent new sanctions are imposed or previously relaxed sanctions are reimposed (including with respect to countries undergoing transformation), complying with such restrictions may prevent the Fund from pursuing certain investments, cause delays or other impediments with respect to consummating such investments or divestments, require divestment or freezing of investments on unfavorable terms, render divestment of underperforming investments impracticable, negatively impact the Fund's ability to achieve their investment objectives, prevent the Fund from receiving payments otherwise due, increase diligence and other similar costs to the Fund, render valuation of affected investments challenging, or require the Fund to consummate an investment on terms that are less advantageous than would be the case absent such restrictions. Any of these outcomes could adversely affect the Fund's performance with respect to such investments, and thus the Fund's performance as a whole.

Initial Public Offerings. The Fund may purchase stock in an initial public offering (“IPO”). An IPO is a company’s first offering of stock to the public. Risks associated with IPOs may include considerable fluctuation in the market value of IPO shares due to certain factors, such as the absence of a prior public market, unseasoned trading, a limited number of shares available for trading, lack of information about the issuer and limited operating history. The purchase of IPO shares may involve high transaction costs. When the Fund’s asset base is small, a significant portion of the Fund’s performance could be attributable to investments in IPOs, because such investments would have a magnified impact on the Fund. As the Fund’s assets grow, the effect of the Fund’s investments in IPOs on the Fund’s performance probably will decline, which could reduce the Fund’s performance. Because of the price volatility of IPO shares, the Fund may choose to hold IPO shares for a very short period of time. This may increase the turnover of the Fund’s portfolio and may lead to increased expenses to the Fund, such as commissions and transaction costs. In addition, the Adviser cannot guarantee continued access to IPOs.

Investment Company Shares. The Fund may invest in shares of other investment companies to the extent permitted by applicable law and subject to certain restrictions. These investment companies typically incur fees that are separate from those fees incurred directly by the Fund. The Fund’s purchase of such investment company securities results in the layering of expenses, such that shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying the Fund’s expenses. Unless an exception is available, Section 12(d)(1)(A) of the 1940 Act prohibits a fund from (i) acquiring more than 3% of the voting shares of any one investment company, (ii) investing more than 5% of its total assets in any one investment company, and (iii) investing more than 10% of its total assets in all investment companies combined. These limits will not apply to the investment of uninvested cash balances in shares of registered or unregistered money market funds whether affiliated or unaffiliated. The foregoing exemption, however, only applies to an unregistered money market fund that (i) limits its investments to those in which a money market fund may invest under Rule 2a-7 of the 1940 Act, and (ii) undertakes to comply with all the other provisions of Rule 2a-7.

For hedging or other purposes, the Fund may invest in investment companies that seek to track the composition and/or performance of specific indexes or portions of specific indexes. Certain of these investment companies, known as ETFs, are traded on a securities exchange. The market prices of index-based investments will fluctuate in accordance with changes in the underlying portfolio securities of the investment company and also due to supply and demand of the investment company’s shares on the exchange upon which the shares are traded. Index-based investments may not replicate or otherwise match the composition or performance of their specified index due to transaction costs, among other things.

Investments by the Fund in other investment companies, including ETFs, will be subject to the limitations of the 1940 Act. Pursuant to Rule 12d1-4 and procedures approved by the Board, the Fund may invest in other investment companies beyond the limits contained in the 1940 Act, subject to certain conditions imposed by Rule 12d1-4 including limits on control and voting of acquired funds’ shares, evaluations and findings by investment advisers, fund investment agreements and limits on most three-tier fund structures.

Certain investment companies whose securities are purchased by the Fund may not be obligated to redeem such securities in an amount exceeding 1% of the investment company’s total outstanding securities during any period of less than 30 days. Therefore, such securities that exceed this amount may be illiquid.

If required by the 1940 Act, the Fund expects to vote the shares of other investment companies that are held by it in the same proportion as the vote of all other holders of such securities.

Japanese Securities Risk. Because a significant portion of the assets of the Fund are invested in Japanese securities, the Fund's performance is expected to be closely tied to the political, social and economic conditions within Japan. The Japanese economy has at times in the past been negatively affected by government intervention and protectionism, a deflationary macroeconomic environment, a heavy reliance on international trade and natural disasters. These factors, as well as an aging population, increases in government debt and changes to fiscal, monetary, or trade policies, may affect Japanese markets and the Fund's performance. As such, the Fund's performance may be more volatile than the performance of funds that are more geographically diverse. Japan also has a growing economic relationship with China and other Southeast Asian countries, and thus Japan's economy may be affected by economic, political and social instability in those countries. Japan's political tensions with its neighbors are also strained, and should political tensions increase, it could adversely affect the Japanese economy, particularly in times of crisis. Japan has experienced natural disasters of varying degrees of severity, and the risks of such phenomena, and damage resulting therefrom, continue to exist. The Japanese yen has also fluctuated widely during recent periods and may be affected by currency volatility elsewhere in Asia, especially Southeast Asia.

Large Shareholder Purchase and Redemption Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions may cause the Fund to sell its securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. Similarly, large share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

Real Estate Investment Trust Securities. The Fund may invest in real estate investment trusts ("REITs"). A REIT is a pooled investment vehicle that purchases primarily income-producing real estate, real estate-related loans or other real estate-related interests. The pooled vehicle then issues shares whose value and investment performance are dependent upon the investment performance of the underlying real estate-related investments. Individual REITs may own a limited number of properties and may concentrate in a particular region or property type. A REIT is a corporation, or a business trust that would otherwise be taxed as a corporation, which meets the definitional requirements of the Internal Revenue Code of 1986, as amended (the "Code"). The Code permits a qualifying REIT to deduct dividends paid, thereby effectively eliminating corporate level Federal income tax and making the REIT a pass-through vehicle for Federal income tax purposes. To meet the definitional requirements of the Code, a REIT must, among other things, invest substantially all of its assets in interests in real estate (including mortgages and other REITs) or cash and government securities, derive most of its income from rents from real property or interest on loans secured by mortgages on real property, and distribute to shareholders annually a substantial portion of its otherwise taxable income.

Generally, REITs can be classified as equity REITs, mortgage REITs and hybrid REITs. Equity REITs invest the majority of their assets directly in real property and derive their income primarily from rents and capital gains from appreciation realized through property sales. Mortgage REITs invest the majority of their assets in real estate mortgages and derive their income primarily from interest payments. Hybrid REITs combine the characteristics of both equity and mortgage REITs. The values of securities issued by REITs are affected by tax and regulatory requirements and by perceptions of management skill. They also are subject to heavy cash flow dependency, defaults by borrowers or tenants, self-liquidation and the possibility of failing to qualify for tax-free status under the Code or to maintain exemption from the 1940 Act. Unexpected high rates of default on the mortgages held by a mortgage pool may adversely affect the value of a mortgage-backed security and could result in losses to a mortgage REIT. The risk of such defaults is generally higher in the case of mortgage pools that include subprime mortgages. To the extent that a mortgage REIT's portfolio is exposed to lower-rated, unsecured or subordinated instruments, the risk of loss may increase, which may have a negative impact on the Fund.

The REITs in which the Fund may invest may be affected by economic forces and other factors related to the real estate industry. REITs are sensitive to factors such as changes in real estate values, property taxes, interest rates, cash flow of underlying real estate assets, occupancy rates, government regulations affecting zoning, land use and rents, and management skill and creditworthiness of the issuer. Companies in the real estate industry may also be subject to liabilities under environmental and hazardous waste laws. REITs whose underlying assets include long-term health care properties; such as nursing, retirement and assisted living homes, may be impacted by federal regulations concerning the health care industry. The Fund will indirectly bear its proportionate share of expenses, including management fees, paid by each REIT in which it invests in addition to the expenses of the Fund. The Fund is also subject to the risk that the REITs in which it invests will fail to qualify for tax-free pass-through of income under the Code, and/or fail to qualify for an exemption from registration as an investment company under the 1940 Act. Mortgage REITs may be affected by the quality of the credit extended. A REIT's return may be adversely affected when interest rates are high or rising.

Investing in REITs may involve risks similar to those associated with investing in small capitalization companies. REITs may have limited financial resources, may trade less frequently and in a limited volume and may be subject to more abrupt or erratic price movements than larger company securities. Historically, small capitalization stocks, such as REITs, have been more volatile in price than the larger capitalization stocks included in the S&P 500[®].

The REIT investments of the Fund may not provide complete tax information to the Fund until after the calendar year-end. Consequently, because of the delay, it may be necessary for the Fund to request permission to extend the deadline for issuance of Forms 1099-DIV beyond January 31. Also, under current provisions of the Code, distributions attributable to operating income of REITs in which the Fund invests are not eligible for favorable tax treatment as long-term capital gains and will be taxable to you as ordinary income. Through 2025, the Fund, however, may designate such distributions as “section 199A dividends” to the extent of the excess of the ordinary REIT dividends, other than capital gain dividends and portions of REIT dividends designated as qualified dividend income, that the Fund receives from a REIT for a taxable year over the Fund’s expenses allocable to such dividends. Section 199A dividends may be taxed to individuals and other non-corporate shareholders at a reduced effective federal income tax rate, provided you have satisfied a holding period requirement for the Fund’s shares and satisfied certain other conditions. Section 199A is currently set to expire after 2025.

Restricted Securities. The Fund may purchase securities which are not registered under the 1933 Act but which may be sold to “qualified institutional buyers” in accordance with Rule 144A under the 1933 Act (“Restricted Securities”). These securities will not be considered illiquid so long as it is determined by the Adviser in accordance with the advice provided by the Sub-Adviser that an adequate trading market exists for the securities. This investment practice could have the effect of increasing the level of illiquidity in an underlying investment company during any period that qualified institutional buyers become uninterested in purchasing restricted securities. In reaching liquidity decisions, the Sub-Adviser may consider, among others, the following factors: (1) the unregistered nature of the security; (2) the frequency of trades and quotes for the security; (3) the number of dealers wishing to purchase or sell the security and the number of other potential purchasers; (4) dealer undertakings to make a market in the security; and (5) the nature of the security and the nature of the marketplace trades (e.g., the time needed to dispose of the security, the method of soliciting offers and the mechanics of the transfer).

The purchase price and subsequent valuation of Restricted Securities normally reflect a discount from the price at which such securities trade when they are not restricted, since the restriction makes them less liquid. The amount of the discount from the prevailing market price is expected to vary depending upon the type of security, the character of the issuer, the party who will bear the expenses of registering the Restricted Securities and prevailing supply and demand conditions.

As consistent with the Fund’s respective investment objective, the Fund may also invest in Section 4(2) commercial paper. Section 4(2) commercial paper is issued in reliance on an exemption from registration under Section 4(2) of the 1933 Act and is generally sold to institutional investors who purchase for investment. Any resale of such commercial paper must be in an exempt transaction, usually to an institutional investor through the issuer or investment dealers who make a market in such commercial paper. The Trust believes that Section 4(2) commercial paper is liquid to the extent it meets the criteria established by the Board. The Trust intends to treat such commercial paper as liquid and not subject to the investment limitations applicable to illiquid securities or restricted securities.

Rights Offerings and Purchase Warrants. Rights offerings and purchase warrants are privileges issued by a corporation which enable the owner to subscribe to and purchase a specified number of shares of the corporation at a specified price during a specified period of time. Subscription rights normally have a short lifespan to expiration. The purchase of rights or warrants involves the risk that the Fund could lose the purchase value of a right or warrant if the right to subscribe to additional shares is not executed prior to the right’s or warrant’s expiration. Also, the purchase of rights and/or warrants involves the risk that the effective price paid for the right and/or warrant added to the subscription price of the related security may exceed the value of the subscribed security’s market price such as when there is no movement in the level of the underlying security.

Securities Lending. The Fund may lend its portfolio securities to financial institutions. Such loans would involve risks of delay in receiving additional collateral in the event the value of the collateral decreases below the value of the securities loaned or of delay in recovering the securities loaned or even loss of rights in the collateral should the borrower of the securities fail financially. However, loans will be made only to borrowers which the Adviser deems to be of good standing and only when, in the Adviser's judgment, the income to be earned from the loans justifies the attendant risks. The Fund may not make loans in excess of 33^{1/3}% of the value of its total assets. The Fund may pay a part of the interest earned from the investment of collateral, or other fee, to an unaffiliated or, to the extent consistent with the 1940 Act or the rules and SEC interpretations thereunder, affiliated third party for acting as the Fund's securities lending agent.

By lending its securities, the Fund may increase its income by receiving payments from the borrower that reflect the amount of any interest or any dividends payable on the loaned securities as well as by either investing cash collateral received from the borrower in short-term instruments or obtaining a fee from the borrower when U.S. government securities or letters of credit are used as collateral. The Fund does not have the right to vote loaned securities. The Fund may attempt to call loaned securities back to permit the exercise of voting rights if time and jurisdictional restrictions permit. There is no guarantee that all loans can be recalled.

Special Note Regarding Market Events. Periods of unusually high financial market volatility and restrictive credit conditions, at times limited to a particular sector or geographic area, have occurred in the past and may be expected to recur in the future. Some countries, including the United States, have adopted or have signaled protectionist trade measures, relaxation of the financial industry regulations that followed the financial crisis, and/or reductions to corporate taxes. The scope of these policy changes is still developing, but the equity and debt markets may react strongly to expectations of change, which could increase volatility, particularly if a resulting policy runs counter to the market's expectations. The outcome of such changes cannot be foreseen at the present time. In addition, geopolitical and other risks, including events such as war, military conflict, acts of terrorism, social unrest, natural disasters, recessions, inflation, threatened or actual imposition of tariffs, rapid interest rate changes, supply chain disruptions, sanctions, the spread of infectious illness or other public health threats could also significantly impact the Fund and its investments. As a result of increasingly interconnected global economies and financial markets, the value and liquidity of the Fund's investments may be negatively affected by events impacting a country or region, regardless of whether the Fund invests in issuers located in or with significant exposure to such country or region.

Disease outbreaks that affect local economies or the global economy may materially and adversely impact the Fund and/or the Adviser's, Sub-Adviser's, or Trading Adviser's business. For example, uncertainties regarding the COVID-19 outbreak have resulted in serious economic disruptions across the globe. Recent events are impacting the securities markets. Governmental authorities and regulators throughout the world, such as the U.S. Federal Reserve, have in the past responded to major economic disruptions with changes to fiscal and monetary policy, including but not limited to, direct capital infusions, new monetary programs, and interest rates changes. Such policy changes may adversely affect the value, volatility and liquidity of dividend and interest paying securities.

In certain cases, an exchange or market may close or issue trading halts on either specific securities or even the entire market, which may result in the Fund being, among other things, unable to buy or sell certain securities or financial instruments or to accurately price its investments. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets. To the extent the Fund may overweight its investments in certain countries, companies, industries or market sectors, such position will increase the Fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors. These conditions could result in the Fund's inability to achieve its investment objectives, cause the postponement of reconstitution or rebalance dates for benchmark indices, adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, negatively impact the Fund's performance, and cause losses on your investment in the Fund.

Additionally, U.S. and global markets recently have experienced increased volatility, including the recent failures of certain U.S. and non-U.S. banks, which could be harmful to the Fund and issuers in which they invest. Conditions in the banking sector are evolving, and the scope of any potential impacts to the Fund and issuers, both from market conditions and also potential legislative or regulatory responses, are uncertain. Continued market volatility and uncertainty and/or a downturn in market and economic and financial conditions, as a result of developments in the banking industry or otherwise (including as a result of delayed access to cash or credit facilities), could have an adverse impact on the Fund and issuers in which it invests.

U.S. Government Securities. The Fund may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one-year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as Federal National Mortgage Association (“Fannie Mae”), Federal Home Loan Mortgage Corporation (“Freddie Mac”), Government National Mortgage Association (“Ginnie Mae”), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the Student Loan Marketing Association, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation (“Farmer Mac”).

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury, while the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity.

Fannie Mae and Freddie Mac have been operating under conservatorship, with the Federal Housing Finance Administration (“FHFA”) acting as their conservator, since September 2008. The entities are dependent upon the continue support of the U.S. Department of the Treasury and FHFA in order to continue their business operations. These factors, among others, could affect the future status and role of Fannie Mae and Freddie Mac and the values of their securities and the securities which they guarantee.

There is risk that the U.S. government will not provide financial support to its agencies, authorities, instrumentalities or sponsored enterprises. The Fund may purchase U.S. government securities that are not backed by the full faith and credit of the United States, such as those issued by Fannie Mae and Freddie Mac. The maximum potential liability of the issuers of some U.S. government securities held by the Fund may greatly exceed their current resources, including their legal right to support from the U.S. Treasury. It is possible that these issuers will not have the funds to meet their payment obligations in the future.

U.S. Treasury Obligations. U.S. Treasury obligations consist of bills, notes and bonds issued by the U.S. Treasury and separately traded interest and principal component parts of such obligations that are transferable through the federal book-entry system known as Separately Traded Registered Interest and Principal Securities (“STRIPS”) and Treasury Receipts (“TRs”).

Receipts. Interests in separately traded interest and principal component parts of U.S. government obligations that are issued by banks or brokerage firms and are created by depositing U.S. government obligations into a special account at a custodian bank. The custodian bank holds the interest and principal payments for the benefit of the registered owners of the certificates or receipts. The custodian bank arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. TRs and STRIPS are interests in accounts sponsored by the U. S. Treasury. Receipts are sold as zero coupon securities.

U.S. Government Zero Coupon Securities. STRIPS and receipts are sold as zero coupon securities, that is, fixed income securities that have been stripped of their unmatured interest coupons. Zero coupon securities are sold at a (usually substantial) discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. The amount of this discount is accreted over the life of the security, and the accretion constitutes the income earned on the security for both accounting and tax purposes. Because of these features, the market prices of zero coupon securities are generally more volatile than the market prices of securities that have similar maturity but that pay interest periodically. Zero coupon securities are likely to respond to a greater degree to interest rate changes than are non-zero coupon securities with similar maturity and credit qualities.

U.S. Government Agencies. Some obligations issued or guaranteed by agencies of the U.S. government are supported by the full faith and credit of the U.S. Treasury, others are supported by the right of the issuer to borrow from the Treasury, while still others are supported only by the credit of the instrumentality. Guarantees of principal by agencies or instrumentalities of the U.S. government may be a guarantee of payment at the maturity of the obligation so that in the event of a default prior to maturity there might not be a market and thus no means of realizing on the obligation prior to maturity. Guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities nor to the value of the Fund's shares.

Inflation-Protected Securities. The Fund may invest in inflation-protected securities issued by the U.S. Treasury, known as "TIPs" or "Treasury Inflation-Protected Securities," which are debt securities whose principal and interest payments are adjusted for inflation and interest is paid on the adjusted amount. The inflation adjustment, which is typically applied monthly to the principal of the bond, follows a designated inflation index, such as the consumer price index. A fixed coupon rate is applied to the inflation-adjusted principal so that as inflation rises, both the principal value and the interest payments increase. This can provide investors with a hedge against inflation, as it helps preserve the purchasing power of the investment. Inflation-protected securities normally will decline in price when real interest rates rise. (A real interest rate is calculated by subtracting the inflation rate from a nominal interest rate. For example, if a 10-year Treasury note is yielding 5% and inflation is 2%, the real interest rate is 3%.) If inflation is negative, the principal and income of an inflation-protected security will decline and could result in losses for the Fund.

Any increase in principal for an inflation-protected security resulting from inflation adjustments is considered by Internal Revenue Service regulations to be taxable income in the year it occurs. For direct holders of an inflation-protected security, this means that taxes must be paid on principal adjustments even though these amounts are not received until the bond matures. By contrast, the Fund holding these securities distributes both interest income and the income attributable to principal adjustments in the form of cash or reinvested shares, which are taxable to shareholders.

Non-Principal Investment Policies and Risks

Derivatives Risk. The Fund may invest in derivative products to, among other things, obtain exposure to specific asset class sectors and seek to hedge against possible adverse impact of changes in stock market prices, currency exchange rates or interest rates in the market value of its securities or securities to be purchased. Rule 18f-4 under the 1940 Act provides for the regulation of a registered investment company's use of derivatives and related instruments. Rule 18f-4 prescribes specific value-at-risk leverage limits for certain derivatives users and requires certain derivatives users to adopt and implement a derivatives risk management program (including the appointment of a derivatives risk manager and the implementation of certain testing requirements), and prescribes reporting requirements in respect of derivatives. Subject to certain conditions, if a fund qualifies as a "limited derivatives user," as defined in Rule 18f-4, it is not subject to the full requirements of Rule 18f-4. As of the date of this SAI, the Fund is relying on the limited derivatives user exception.

With respect to reverse repurchase agreements or other similar financing transactions in particular, including certain tender option bonds, Rule 18f-4 permits a fund to enter into such transactions if the fund either (i) complies with the asset coverage requirements of Section 18 of the 1940 Act, and combines the aggregate amount of indebtedness associated with all reverse repurchase agreements or similar financing transactions with the aggregate amount of any other senior securities representing indebtedness when calculating the relevant asset coverage ratio, or (ii) treats all reverse repurchase agreements or similar financing transactions as derivatives transactions for all purposes under Rule 18f-4. The Fund has adopted procedures for investing in derivatives and other transactions in compliance with Rule 18f-4. Limits or restrictions applicable to the counterparties or issuers, as applicable, with which the Fund may engage in derivative transactions could also limit or prevent the Fund from using certain instruments. The use of derivatives is also subject to operational and legal risks. Operational risks generally refer to risks related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls, and human error. Legal risks generally refer to risks of loss resulting from insufficient documentation, insufficient capacity or authority of counterparty, or legality or enforceability of a contract.

Currency Exchange Transactions. The Fund may engage in a currency exchange transaction through a forward currency exchange contract (or other cash management position). A currency exchange transaction may be conducted either on a spot (i.e., cash) basis at the spot rate for purchasing or selling currency prevailing in the foreign exchange market or through a forward currency exchange contract ("Forward Contract") (or other cash management position). A Forward Contract is an agreement to purchase or sell a specified currency at a specified future date (or within a specified time period) at a price set at the time of the contract. Forward Contracts are usually entered into with banks and broker-dealers, are not exchange traded and are usually for less than one year.

Currency exchange transactions may involve currencies of the different countries in which the Fund may invest, and may serve as hedges against possible variations in the exchange rates between these currencies and the U.S. dollar. The Fund's currency transactions may include transaction hedging and portfolio hedging involving either specific transactions or portfolio positions. Transaction hedging is the purchase or sale of a Forward Contract (or other cash management position) with respect to specific payables or receivables of the Fund in connection with the purchase or sale of portfolio securities. Portfolio hedging is the use of a Forward Contract (or other cash management position) with respect to one or more portfolio security positions denominated or quoted in a particular currency. The Fund may engage in portfolio hedging with respect to the currency of a particular country in amounts approximating actual or anticipated positions in securities denominated in that currency. In addition to hedging transactions, the Fund's currency transactions may include those intended to profit from anticipated currency exchange fluctuations, even if not related to any particular Fund transaction or portfolio position, which can result in losses if such fluctuations do not occur as anticipated. At the maturity of a Forward Contract to deliver a particular currency, the Fund may either sell the portfolio security related to such contract and make delivery of the currency, or it may retain the security and either acquire the currency on the spot market or terminate its contractual obligation to deliver the currency by purchasing an offsetting contract with the same currency trader obligating it to purchase on the same maturity date the same amount of the currency.

It is impossible to forecast with absolute precision the market value of portfolio securities at the expiration of a Forward Contract. Accordingly, it may be necessary for the Fund to purchase additional currency on the spot market (and bear the expense of such purchase) if the market value of the security is less than the amount of currency the Fund is obligated to deliver, and if a decision is made to sell the security and make delivery of the currency. Conversely, it may be necessary to sell on the spot market some of the currency received upon the sale of the portfolio security if its market value exceeds the amount of currency the Fund is obligated to deliver. If the Fund retains the portfolio security and engages in an offsetting transaction, the Fund will incur a gain or a loss to the extent that there has been movement in Forward Contract prices. If the Fund engages in an offsetting transaction, it may subsequently enter into a new Forward Contract to sell the currency. Should forward prices decline during the period between the date the Fund enters into a Forward Contract for the sale of a currency and the date it enters into an offsetting contract for the purchase of the currency, the Fund will realize a gain to the extent the price of the currency it has agreed to sell exceeds the price of the currency it has agreed to purchase. Should forward prices increase, the Fund will suffer a loss to the extent the price of the currency it has agreed to purchase exceeds the price of the currency it has agreed to sell. A default on the contract would deprive the Fund of unrealized profits or force the Fund to cover its commitments for purchase or sale of currency, if any, at the current market price.

Hedging against a decline in the value of a currency does not eliminate fluctuations in the prices of portfolio securities or prevent losses if the prices of such securities decline. Such transactions also preclude the opportunity for gain if the value of the hedged currency should rise. Moreover, it may not be possible for the Fund to hedge against a devaluation that is so generally anticipated that the Fund is not able to contract to sell the currency at a price above the devaluation level it anticipates. The cost to the Fund of engaging in currency exchange transactions varies with such factors as the currency involved, the length of the contract period and prevailing market conditions. Since currency exchange transactions are usually conducted on a principal basis, no fees or commissions are involved.

Options On Securities. The Fund may purchase and write (*i.e.*, sell) put and call options. Such options may relate to particular securities or indices, and may or may not be listed on a domestic or foreign securities exchange and may or may not be issued by the Options Clearing Corporation. Options trading is a highly specialized activity that entails greater than ordinary investment risk. Options may be more volatile than the underlying instruments, and therefore, on a percentage basis, an investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves.

A call option for a particular security gives the purchaser of the option the right to buy, and the writer (seller) the obligation to sell, the underlying security at the stated exercise price at any time prior to the expiration of the option, regardless of the market price of the security. The premium paid to the writer is in consideration for undertaking the obligation under the option contract. A put option for a particular security gives the purchaser the right to sell the security at the stated exercise price at any time prior to the expiration date of the option, regardless of the market price of the security.

Index options are put options and call options on various indices. In most respects, they are identical to listed options on other securities ("non-index options"). The primary difference between non-index options and index options occurs when index options are exercised. In the case of non-index options, the underlying security is delivered. However, upon the exercise of an index option, settlement does not occur by delivery of the securities comprising the index. The option holder who exercises the index option receives an amount of cash if the closing level of the index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the exercise price of the option. This amount of cash is equal to the difference between the closing price of the index and the exercise price of the option expressed in dollars times a specified multiple.

The Fund's obligation to sell an instrument subject to a call option written by it, or to purchase an instrument subject to a put option written by it, may be terminated prior to the expiration date of the option by the Fund's execution of a closing purchase transaction, which is effected by purchasing on an exchange an option of the same series (*i.e.*, same underlying instrument, exercise price and expiration date) as the option previously written. A closing purchase transaction will ordinarily be effected to realize a profit on an outstanding option, to prevent an underlying instrument from being called, to permit the sale of the underlying instrument or to permit the writing of a new option containing different terms on such underlying instrument. The cost of such a liquidation purchase plus transactions costs may be greater than the premium received upon the original option, in which event the Fund will have incurred a loss in the transaction. There is no assurance that a liquid secondary market will exist for any particular option. An option writer unable to effect a closing purchase transaction will not be able to sell the underlying instrument or liquidate the assets held in a segregated account, until the option expires or the optioned instrument is delivered upon exercise. In such circumstances, the writer will be subject to the risk of market decline or appreciation in the instrument during such period.

If an option purchased by the Fund expires unexercised, the Fund realizes a loss equal to the premium paid. If the Fund enters into a closing sale transaction on an option purchased by it, the Fund will realize a gain if the premium received by the Fund on the closing transaction is more than the premium paid to purchase the option or a loss if it is less. If an option written by the Fund expires on the stipulated expiration date or if the Fund enters into a closing purchase transaction, it will realize a gain (or loss if the cost of a closing purchase transaction exceeds the net premium received when the option is sold). If an option written by the Fund is exercised, the proceeds of the sale will be increased by the net premium originally received and the Fund will realize a gain or loss.

Certain Risks Regarding Options. There are several risks associated with transactions in options. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. In addition, a liquid secondary market for particular options, whether traded over-the-counter or on an exchange, may be absent for reasons which include the following: there may be insufficient trading interest in certain options; restrictions may be imposed by an exchange on opening transactions or closing transactions or both; trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options or underlying securities or currencies; unusual or unforeseen circumstances may interrupt normal operations on an exchange; the facilities of an exchange or the Options Clearing Corporation may not at all times be adequate to handle current trading value; or one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options that had been issued by the Options Clearing Corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

Successful use by the Fund of options on indices will be subject to the ability of the Trading Adviser to correctly predict movements in the directions of the stock market. This requires different skills and techniques than predicting changes in the prices of individual securities. In addition, the Fund's ability to effectively hedge all or a portion of the securities in its portfolio, in anticipation of or during a market decline, through transactions in put options on indices, depends on the degree to which price movements in the underlying index correlate with the price movements of the securities held by the Fund. Inasmuch as the Fund's securities will not duplicate the components of an index, the correlation will not be perfect. Consequently, the Fund bears the risk that the prices of its securities being hedged will not move in the same amount as the prices of its put options on the indices. It is also possible that there may be a negative correlation between the index and the Fund's securities that would result in a loss on both such securities and the options on indices acquired by the Fund.

The hours of trading for options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that cannot be reflected in the options markets. The purchase of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The purchase of index options involves the risk that the premium and transaction costs paid by the Fund in purchasing an option will be lost as a result of unanticipated movements in prices of the securities comprising the index on which the option is based.

There is no assurance that a liquid secondary market on an options exchange will exist for any particular option, or at any particular time, and for some options no secondary market on an exchange or elsewhere may exist. If the Fund is unable to close out a call option on securities that it has written before the option is exercised, the Fund may be required to purchase the optioned securities in order to satisfy its obligation under the option to deliver such securities. If the Fund were unable to effect a closing sale transaction with respect to options on securities that it has purchased, it would have to exercise the option in order to realize any profit and would incur transaction costs upon the purchase and sale of the underlying securities.

Futures and Options on Futures. Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a specific security at a specified future time and at a specified price. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. The Fund may reduce the risk that it will be unable to close out a futures contract by only entering into futures contracts that are traded on a national futures exchange regulated by the Commodities Futures Trading Commission ("CFTC"). The Fund may use futures contracts and related options for: bona fide hedging; attempting to offset changes in the value of securities held or expected to be acquired or be disposed of; attempting to minimize fluctuations in foreign currencies; attempting to gain exposure to a particular market, index or instrument; or other risk management purposes. To the extent futures and/or options on futures are employed by the Fund, the Fund will limit such investments in commodity futures, commodity options contracts and swaps to below the de minimis thresholds adopted by the CFTC in its recent amendments to Rule 4.5 (see below for a description of these thresholds). For this reason, the Trading Adviser is not required to register as a "commodity pool operator" ("CPO") under the Commodity Exchange Act at this time.

With respect to investments in swap transactions, commodity futures, commodity options or certain other derivatives used for purposes other than *bona fide* hedging purposes, an investment company must meet one of the following tests under the amended regulations in order to claim an exemption from being considered a “commodity pool” or a CPO. First, the aggregate initial margin and premiums required to establish an investment company’s positions in such investments may not exceed five percent (5%) of the liquidation value of the investment company’s portfolio (after accounting for unrealized profits and unrealized losses on any such investments). Alternatively, the aggregate net notional value of such instruments, determined at the time of the most recent position established, may not exceed one hundred percent (100%) of the liquidation value of the investment company’s portfolio (after accounting for unrealized profits and unrealized losses on any such positions). In addition to meeting one of the foregoing trading limitations, the investment company may not market itself as a commodity pool or otherwise as a vehicle for trading in the commodity futures, commodity options or swaps and derivatives markets. In the event that the Adviser were required to register as a CPO with respect to the Fund, the disclosure and operations of the Fund would need to comply with all applicable CFTC regulations.

An index futures contract is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified dollar amount times the difference between the index value at the close of trading of the contract and the price at which the futures contract is originally struck. No physical delivery of the securities comprising the index is made; generally, contracts are closed out prior to the expiration date of the contract.

The Fund is required to comply with Rule 18f-4 under the 1940 Act.

There are significant risks associated with the Fund’s use of futures contracts and related options, including the following: (1) the success of a hedging strategy may depend on the Adviser’s investment adviser’s ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) there may be an imperfect or no correlation between the changes in market value of the securities held by the Fund and the prices of futures and options on futures; (3) there may not be a liquid secondary market for a futures contract or option; (4) trading restrictions or limitations may be imposed by an exchange; and (5) government regulations may restrict trading in futures contracts and options on futures. In addition, some strategies reduce the Fund’s exposure to price fluctuations, while others tend to increase its market exposure.

Certain Investment Techniques and Derivatives Risks. When the Trading Adviser uses investment techniques such as margin, leverage and short sales, and forms of financial derivatives, such as options and futures, an investment in the Fund may be more volatile than investments in other mutual funds. Although the intention is to use such investment techniques and derivatives to minimize risk to the Fund, as well as for speculative purposes, there is the possibility that improper implementation of such techniques and derivative strategies or unusual market conditions could result in significant losses to the Fund. Derivatives are used to limit risk in the Fund or to enhance investment return and have a return tied to a formula based upon an interest rate, index, price of a security, or other measurement. Derivatives involve special risks, including: (1) the risk that interest rates, securities prices and currency markets will not move in the direction that a portfolio manager anticipates; (2) imperfect correlation between the price of derivative instruments and movements in the prices of the securities, interest rates or currencies being hedged; (3) the fact that skills needed to use these strategies are different than those needed to select portfolio securities; (4) the possible absence of a liquid secondary market for any particular instrument and possible exchange imposed price fluctuation limits, either of which may make it difficult or impossible to close out a position when desired; (5) the risk that adverse price movements in an instrument can result in a loss substantially greater than the Fund’s initial investment in that instrument (in some cases, the potential loss is unlimited); (6) particularly in the case of privately-negotiated instruments, the risk that the counterparty will not perform its obligations, or that penalties could be incurred for positions held less than the required minimum holding period, which could leave the Fund worse off than if it had not entered into the position; and (7) the inability to close out certain hedged positions to avoid adverse tax consequences. In addition, the use of derivatives for non-hedging purposes (that is, to seek to increase total return) is considered a speculative practice and may present an even greater risk of loss than when used for hedging purposes.

Illiquid Investments. Pursuant to Rule 22e-4 (“Rule 22e-4” or the “Liquidity Rule”) under the 1940 Act, the Fund may invest up to 15% of its net assets in illiquid investments. An illiquid investment as defined in Rule 22e-4 is an investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions within seven calendar days or less without the sale or disposition significantly changing the market value of the investment. These investments may include restricted securities and repurchase agreements maturing in more than seven days. Restricted securities are securities that may not be sold to the public without an effective registration statement under the Securities Act of 1933, as amended (the “1933 Act”), and thus may be sold only in privately negotiated transactions or pursuant to an exemption from registration. Subject to the adoption of guidelines by the Board, certain restricted securities that may be sold to institutional investors pursuant to Rule 144A under the 1933 Act and non-exempt commercial paper may be determined to be liquid by the Adviser. Illiquid investments involve the risk that the investments will not be able to be sold at the time the Adviser desires or at prices approximating the value at which the Fund is carrying the investments. To the extent an investment held by the Fund is deemed to be an illiquid investment or a less liquid investment, the Fund will be exposed to greater liquidity risk.

The Trust has implemented a liquidity risk management program and related procedures to identify illiquid investments pursuant to Rule 22e-4. If the limitation on illiquid investments is exceeded, the condition will be reported to the Board and, when required by the Liquidity Rule, to the SEC.

Pandemic Risk. Disease outbreaks that affect local economies or the global economy may materially and adversely impact the Fund and/or the Adviser's business. For example, uncertainties regarding the COVID-19 outbreak resulted in serious economic disruptions across the globe. These types of outbreaks can be expected to cause severe decreases in core business activities such as manufacturing, purchasing, tourism, business conferences and workplace participation, among others. These disruptions lead to instability in the market place, including stock market losses and overall volatility, as occurred in connection with COVID-19. In the face of such instability, governments may take extreme and unpredictable measures to combat the spread of disease and mitigate the resulting market disruptions and losses. The Adviser has in place business continuity plans reasonably designed to ensure that it maintains normal business operations, and it periodically tests those plans. However, in the event of a pandemic or an outbreak, there can be no assurance that the Adviser or the Fund's service providers will be able to maintain normal business operations for an extended period of time or will not lose the services of key personnel on a temporary or long-term basis due to illness or other reasons. Although vaccines for COVID-19 are widely available, the full impacts of a pandemic or disease outbreaks are unknown and the pace of recovery may vary from market to market, resulting in a high degree of uncertainty for potentially extended periods of time.

Temporary Defensive Positions. In anticipation of or in response to adverse market, economic, political or other conditions, the Fund may take temporary defensive positions (up to 100% of its assets) in cash, cash equivalents and all types of money market and short-term debt securities. If the Fund were to take a temporary defensive position, it may be unable to achieve its investment objective for a period of time.

INVESTMENT RESTRICTIONS

The Trust has adopted the following investment restrictions as fundamental policies with respect to the Fund. These restrictions cannot be changed with respect to the Fund without the approval of the holders of a majority of the Fund's outstanding voting securities. For the purposes of the 1940 Act, a "majority of outstanding shares" means the vote of the lesser of: (1) 67% or more of the voting securities of the Fund present at the meeting if the holders of more than 50% of the Fund's outstanding voting securities are present or represented by proxy; or (2) more than 50% of the outstanding voting securities of the Fund. Notwithstanding the fundamental and non-fundamental investment restrictions provided below, the Fund's investments and operations will be limited by the terms and conditions of its exemptive order.

Except with the approval of a majority of the outstanding voting securities, the Fund may not:

1. Borrow money or issue senior securities, except that the Fund may borrow from banks and enter into reverse repurchase agreements provided that there is at least 300% asset coverage for the borrowings of the Fund. The Fund may not mortgage, pledge or hypothecate any assets, except in connection with any such borrowing and then in amounts not in excess of one-third of the value of the Fund's total assets at the time of such borrowing. However, the amount shall not be in excess of lesser of the dollar amounts borrowed or $33\frac{1}{3}\%$ of the value of the Fund's total assets at the time of such borrowing, provided that: (a) short sales and related borrowings of securities are not subject to this restriction; and (b) for the purposes of this restriction, collateral arrangements with respect to options, short sales, futures contracts, options on futures contracts, collateral arrangements with respect to initial and variation margin and collateral arrangements with respect to derivatives instruments are not deemed to be a pledge or other encumbrance of assets. Securities held in escrow or separate accounts in connection with the Fund's investment practices are not considered to be borrowings or deemed to be pledged for purposes of this limitation;

2. Act as an underwriter of securities within the meaning of the 1933 Act, except insofar as it might be deemed to be an underwriter upon disposition of certain portfolio securities acquired within the limitation on purchases of restricted securities;
 3. Purchase or sell real estate (including real estate limited partnership interests), provided that the Fund may invest: (a) in securities secured by real estate or interests therein or issued by companies that invest in real estate or interests therein; or (b) in real estate investment trusts;
 4. Purchase or sell commodities or commodity contracts, except as permitted by the 1940 Act, as amended, and as interpreted or modified by the regulatory authority having jurisdiction from time to time;
 5. Make loans, except through loans of portfolio securities and repurchase agreements, provided that for purposes of this restriction the acquisition of bonds, debentures or other debt instruments or interests therein and investment in government obligations, loan participations and assignments, short-term commercial paper, certificates of deposit and bankers' acceptances shall not be deemed to be the making of a loan;
 6. Purchase securities of one or more issuers conducting their principal business activity in the same industry or group of industries, if immediately after such purchase the value of its investments in such industry would exceed 25% or more of its total assets provided that this restriction shall not apply to securities issued or guaranteed as to principal and interest by the U.S. government, its agencies or instrumentalities; provided, however, that the Fund may invest all or part of its investable assets in an open-end investment company with substantially the same investment objective, policies and restrictions as the Fund;* or
 7. Purchase the securities of any one issuer, other than securities issued or guaranteed by the U.S. government or its agencies or instrumentalities, if immediately after and as a result of such purchase, more than 5% of the value of the Fund's total assets would be invested in the securities of such issuer, or more than 10% of the outstanding voting securities of such issuer would be owned by the Fund, except that up to 25% of the value of the Fund's total assets may be invested without regard to such limitations.
- * For purposes of Investment Restriction Number 6, the Fund will look through to the underlying investments of an acquired open-end investment company for purposes of complying with its concentration policy.

In addition to the fundamental investment limitations specified above, the Fund is subject to the following non-fundamental limitations, which may be changed without shareholder approval, in compliance with applicable law and regulatory policy. The Fund may not:

1. Acquire any illiquid asset if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid assets. An illiquid asset is any asset which may not be sold or disposed of in the ordinary course of business within seven days at approximately the value at which the Fund has valued the investment.

The Fund may invest in securities issued by other investment companies within the limits prescribed by the 1940 Act. As a shareholder of another investment company, the Fund would bear, along with other shareholders, its pro rata portion of the other investment company's expenses, including advisory fees. These expenses would be in addition to the advisory and other expenses that the Fund bears directly in connection with its own operations.

Securities held by the Fund generally may not be purchased from, sold or loaned to the Adviser or its affiliates or any of their directors, officers or employees, acting as principal, unless pursuant to a rule or exemptive order under the 1940 Act.

If a percentage restriction under one of the Fund's investment policies or limitations or the use of assets is adhered to at the time a transaction is effected, later changes in percentages resulting from changing values will not be considered a violation (except with respect to any restrictions that may apply to borrowings or senior securities issued by the Fund).

EXCHANGE LISTING AND TRADING

Shares are listed for trading and trade throughout the day on the Exchange.

There can be no assurance that the Fund will continue to meet the requirements of the Exchange necessary to maintain the listing of the Fund's shares. The Exchange may, but is not required to, remove the shares of the Fund from listing if, among other things (i) following the initial 12-month period beginning upon the commencement of trading of the fund, there are fewer than 50 beneficial owners of the Fund's shares; (ii) the Fund's portfolio holdings are not made available to all market participants at the same time; (iii) the Fund has failed to file any filings required by the SEC or the Exchange is aware that the Fund is not in compliance with the conditions of any exemptive order or no-action relief granted by the SEC or its staff under the 1940 Act with respect to the Fund; (iv) the Exchange's ongoing listing requirements are not continuously maintained; (v) any of the continuous listing representations for the issue of the Fund's shares are not continuously met; or (vi) such other event shall occur or condition exists that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will remove the Fund's shares from listing and trading upon termination of the Fund. The Exchange will remove the Fund's shares from listing and trading upon termination of the Fund.

The Trust reserves the right to adjust the price levels of its shares in the future to help maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund.

As in the case of other stocks traded on the Exchange, broker's commissions on transactions will be based on negotiated commission rates at customary levels.

MANAGEMENT OF THE TRUST

The business and affairs of the Trust are managed under the oversight of the Board, subject to the laws of the State of Delaware and the Trust's organizational documents. The Trustees are responsible for deciding matters of overall policy and overseeing the actions of the Trust's service providers. The officers of the Trust conduct and supervise the Trust's daily business operations.

Trustees who are not deemed to be "interested persons" of the Trust (as defined in the 1940 Act) are referred to as "Independent Trustees." Trustees who are deemed to be "interested persons" of the Trust are referred to as "Interested Trustees." The Board is currently composed of five Independent Trustees and two Interested Trustees. The Board has selected Arnold M. Reichman, an Independent Trustee, to act as Chair. Mr. Reichman's duties include presiding at meetings of the Board and interfacing with management to address significant issues that may arise between regularly scheduled Board and Committee meetings. In the performance of his duties, Mr. Reichman will consult with the other Independent Trustees and the Trust's officers and legal counsel, as appropriate. The Chair may perform other functions as requested by the Board from time to time.

The Board meets as often as necessary to discharge its responsibilities. Currently, the Board conducts regular, in-person meetings at least four times a year, and holds special in-person or telephonic meetings as necessary to address specific issues that require attention prior to the next regularly scheduled meeting. The Board also relies on professionals, such as the Trust's independent registered public accounting firms and legal counsel, to assist the Trustees in performing their oversight responsibilities.

The Board has established seven standing committees — Audit, Contract, Executive, Nominating and Governance, Product Development, Regulatory Oversight, and Valuation Committees. The Board may establish other committees, or nominate one or more Trustees to examine particular issues related to the Board's oversight responsibilities, from time to time. Each Committee meets periodically to perform its delegated oversight functions and reports its findings and recommendations to the Board. For more information on the Committees, see the section entitled "Standing Committees."

The Board has determined that the Trust's leadership structure is appropriate because it allows the Board to effectively perform its oversight responsibilities.

Trustees and Executive Officers

The Trustees and executive officers of the Trust, their ages, business addresses and principal occupations during the past five years are set forth in this section. ⁽¹⁾

Name, Address, and Age	Position(s) Held with Trust	Term of Office and Length of Time Served ⁽¹⁾	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee*	Other Directorships Held by Trustee During Past 5 Years
INDEPENDENT TRUSTEES					
Gregory P. Chandler 615 East Michigan Street Milwaukee, WI 53202 Age: 58	Trustee	June 2021 to present	Since 2020, Chief Financial Officer, HC Parent Corp. d/b/a Herspiegel Consulting LLC (life sciences consulting services); 2020, Chief Financial Officer, Avocado Systems Inc. (cyber security software provider); from 2009-2020, Chief Financial Officer, Emtec, Inc. Jillian L. Bosmann One Logan Square Ste. 2000 Philadelphia, PA 19103 Age: 46	Assistant Secretary	June 2021 to present	Since 2017, Partner, Faegre Drinker Biddle & Reath LLP (law firm).	N/A	N/A

* Each Trustee oversees 86 portfolios of the fund complex, consisting of the series in the Trust (14 portfolios) and in The RBB Fund, Inc. (72 portfolios).

- (1) Subject to the Trust's Retirement Policy, each Trustee may continue to serve as a Trustee until the last day of the calendar year in which the applicable Trustee attains age 75 or until his or her successor is elected and qualified or his or her death, resignation or removal. The Board reserves the right to waive the requirements of the Policy with respect to an individual Trustee. The Board has approved waivers of the policy with respect to Messrs. Giordano, Reichman, and Sablowsky. Each officer holds office at the pleasure of the Board until the next special meeting of the Trust or until his or her successor is duly elected and qualified, or until he or she dies, resigns or is removed.
- (2) Messrs. Sablowsky and Shea are considered "interested persons" of the Trust as that term is defined in the 1940 Act and are referred to as an "Interested Trustee." Mr. Sablowsky is considered an "Interested Trustee" of the Trust by virtue of his position as a senior officer of Oppenheimer & Co., Inc., a registered broker-dealer. Mr. Shea is considered an "Interested Trustee" of the Trust by virtue of his position on the Board of Barclays Bank plc, a multinational bank.

Trustee Experience, Qualifications, Attributes and/or Skills

The information above includes each Trustee's principal occupations during the last five years. Each Trustee possesses extensive additional experience, skills and attributes relevant to his or her qualifications to serve as a Trustee. The cumulative background of each Trustee led to the conclusion that each Trustee should serve as a Trustee of the Trust. Mr. Chandler has demonstrated leadership and management abilities as evidenced by his senior executive-level positions in the investment technology consulting/services and investment banking/brokerage industries, and also serves on various boards. Ms. Dolly has over three decades of experience in the financial services industry, and she has demonstrated her leadership and management abilities by serving in numerous senior executive-level positions. Mr. Giordano has years of experience as a consultant to financial services organizations and also serves on the boards of other registered investment companies. Mr. Reichman brings decades of investment management experience to the Board, in addition to senior executive-level management experience. Mr. Sablowsky has demonstrated leadership and management abilities as evidenced by his senior executive-level positions in the financial services industry. Mr. Shea has demonstrated leadership and management abilities as evidenced by his senior executive-level positions in the brokerage, clearing, banking and investment services industry, including service on the boards of public companies, industry regulatory organizations and a university. Ms. Tirinnanzi has over 20 years of strategic, regulatory and operational management experience in the financial and mortgage industries, including service on the boards of a public company and real estate investment trust, and brings to the Board her expertise regarding derivatives markets and related businesses.

Standing Committees

The responsibilities of each Committee of the Board and its members are described below.

Audit Committee. The Board has an Audit Committee comprised of three Independent Trustees. The current members of the Audit Committee are Ms. Tirinnanzi and Messrs. Chandler and Giordano. The Audit Committee, among other things, reviews results of the annual audit and approves the firm(s) to serve as independent auditors. The Audit Committee convened four times during the fiscal year ended August 31, 2024.

Contract Committee. The Board has a Contract Committee comprised of an Interested Trustee and two Independent Trustees. The current members of the Contract Committee are Mses. Dolly and Tirinnanzi and Mr. Sablowsky. The Contract Committee reviews and makes recommendations to the Board regarding the approval and continuation of agreements and plans of the Trust. The Contract Committee convened five times during the fiscal year ended August 31, 2024.

Executive Committee. The Board has an Executive Committee comprised of an Interested Trustee and three Independent Trustees. The current members of the Executive Committee are Messrs. Chandler, Giordano, Reichman and Sablowsky. The Executive Committee may generally carry on and manage the business of the Trust when the Board is not in session. The Executive Committee did not meet during the fiscal year ended August 31, 2024.

Nominating and Governance Committee. The Board has a Nominating and Governance Committee comprised of three Independent Trustees. The current members of the Nominating and Governance Committee are Messrs. Chandler, Giordano and Reichman. The Nominating and Governance Committee recommends to the Board all persons to be nominated as Trustees of the Trust. The Nominating and Governance Committee will consider nominees recommended by shareholders. Recommendations should be submitted to the Committee care of the Trust's Secretary. The Nominating and Governance Committee convened four times during the fiscal year ended August 31, 2024.

Product Development Committee. The Board has a Product Development Committee comprised of the Interested Trustees and two Independent Trustees. The current members of the Product Development Committee are Messrs. Chandler, Reichman, Sablowsky and Shea. The Product Development Committee oversees the process regarding the addition of new investment advisers and investment products to the Trust. The Product Development Committee met seven times during the fiscal year ended August 31, 2024.

Regulatory Oversight Committee. The Board has a Regulatory Oversight Committee comprised of the Interested Trustees and two Independent Trustees. The current members of the Regulatory Oversight Committee are Ms. Dolly and Messrs. Reichman, Sablowsky, and Shea. The Regulatory Oversight Committee monitors regulatory developments in the mutual fund industry and focuses on various regulatory aspects of the operation of the Trust. The Regulatory Oversight Committee met four times during the fiscal year ended August 31, 2024.

Valuation Committee. The Board has a Valuation Committee comprised of the Interested Trustees and two officers of the Trust. The members of the Valuation Committee are Messrs. Faia, Sablowsky, Shea and Shaw. The Valuation Committee is responsible for reviewing fair value determinations. The Valuation Committee met five times during the fiscal year ended August 31, 2024.

Risk Oversight

The Board performs its risk oversight function for the Trust through a combination of (1) direct oversight by the Board as a whole and Board committees and (2) indirect oversight through the Trust's investment advisers and other service providers, Trust officers and the Trust's Chief Compliance Officer ("CCO"). The Trust is subject to a number of risks, including but not limited to investment risk, compliance risk, operational risk, reputational risk, credit risk and counterparty risk. Day-to-day risk management with respect to the Trust is the responsibility of the Trust's investment advisers or other service providers (depending on the nature of the risk) that carry out the Trust's investment management and business affairs. Each of the investment advisers and the other service providers have their own independent interest in risk management and their policies and methods of risk management will depend on their functions and business models and may differ from the Trust's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls.

The Board provides risk oversight by receiving and reviewing on a regular basis reports from the Trust's investment advisers or other service providers, receiving and approving compliance policies and procedures, periodic meetings with the Trust's portfolio managers to review investment policies, strategies and risks, and meeting regularly with the Trust's CCO to discuss compliance reports, findings and issues. The Board also relies on the Trust's investment advisers and other service providers, with respect to the day-to-day activities of the Trust, to create and maintain procedures and controls to minimize risk and the likelihood of adverse effects on the Trust's business and reputation.

Board oversight of risk management is also provided by various Board Committees. For example, the Audit Committee meets with the Trust's independent registered public accounting firms to ensure that the Trust's respective audit scopes include risk-based considerations as to the Trust's financial position and operations.

The Board may, at any time and in its discretion, change the manner in which it conducts risk oversight. The Board's oversight role does not make the Board a guarantor of the Trust's investments or activities.

Trustee Ownership of Shares of the Trust

The following table sets forth the dollar range of equity securities beneficially owned by each Trustee in the Fund and in all of the portfolios of the Trust and The RBB Fund, Inc. (which for each Trustee comprise all registered investment companies within the Trust's family of investment companies overseen by him or her), as of December 31, 2024, including amounts through the deferred compensation plan:

Name of Trustee	Dollar Range of Equity Securities in the Fund ⁽¹⁾	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee within the Family of Investment Companies
		Companies
Independent Trustees		
Gregory P. Chandler	None	Over \$100,000
Lisa A. Dolly	None	None
Nicholas A. Giordano	None	\$10,001-\$50,000
Arnold M. Reichman	None	Over \$100,000
Martha A. Tirinnanzi	None	None
Interested Trustees		
Robert Sablowsky	None	Over \$100,000
Brian T. Shea	None	\$10,001-\$50,000

(1) The Fund had not commenced operations prior to the date of this SAI.

Trustees' and Officers' Compensation

Effective January 1, 2025, the Trust and The RBB Fund, Inc., based on an allocation formula, pay each Trustee a retainer at the rate of \$225,000 annually, \$15,000 for each regular meeting of the Board attended in-person; \$6,000 for each Regulatory Oversight Committee meeting attended in-person; \$5,000 for each other committee (excluding the Regulatory Oversight Committee) meeting attended in-person; \$9,000 and \$6,500, respectively, for each special in-person or telephonic Board meeting that lasts longer than 30 minutes; \$4,000 for each special committee meeting that lasts longer than 30 minutes; \$3,000 for each special Board or committee meeting that lasts less than 30 minutes. The Chair of the Audit Committee and Chair of the Regulatory Oversight Committee each receives an additional fee of \$50,000 for their services. The Chair of the Contract Committee and the Chair of the Nominating and Governance Committee each receives an additional fee of \$40,000 per year for their services. The Vice Chair of the Regulatory Oversight Committee receives an additional fee of \$25,000 for his services. The Chair of the Board receives an additional fee of \$125,000 per year for his services in this capacity and the Vice Chair of the Board receives an additional fee of \$50,000 per year for his services in this capacity.

From January 1, 2024 through December 31, 2024, the Trust and The RBB Fund, Inc., based on an allocation formula, paid each Trustee a retainer at the rate of \$175,000 annually, \$13,500 for each regular meeting of the Board attended in-person; \$5,000 for each Regulatory Oversight Committee meeting attended in-person; \$4,000 for each other committee (excluding the Regulatory Oversight Committee) meeting attended in-person; \$7,500 and \$5,000, respectively, for each special in-person or telephonic Board meeting that lasts longer than 30 minutes; \$3,000 for each special committee meeting that lasts longer than 30 minutes; \$2,000 for each special Board or committee meeting that lasts less than 30 minutes. The Chair of the Audit Committee and Chair of the Regulatory Oversight Committee each received an additional fee of \$35,000 for their services. The Chair of the Contract Committee and the Chair of the Nominating and Governance Committee each received an additional fee of \$25,000 per year for their services. The Vice Chair of the Regulatory Oversight Committee received an additional fee of \$15,000 for his services. The Chair of the Board received an additional fee of \$100,000 per year for his services in this capacity and the Vice Chair of the Board received an additional fee of \$40,000 per year for his services in this capacity.

From January 1, 2023 through December 31, 2023, the Trust and The RBB Fund, Inc., based on an allocation formula, paid each Trustee a retainer at the rate of \$150,000 annually, \$13,500 for each regular meeting of the Board, \$5,000 for each Regulatory Oversight Committee meeting attended in-person, \$4,000 for each other committee (excluding the Regulatory Oversight Committee) meeting attended in-person, and \$2,000 for each committee meeting attended telephonically or special meeting of the Board attended in-person or telephonically. The Chair of the Audit Committee and Chair of the Regulatory Oversight Committee each received an additional fee of \$20,000 for his services. The Chair of the Contract Committee and the Chair of the Nominating and Governance Committee each received an additional fee of \$10,000 per year for his services. The Vice Chair of the Board received an additional fee of \$35,000 per year for his services in this capacity and the Chair of the Board received an additional fee of \$75,000 per year for his services in this capacity.

Trustees are reimbursed for any reasonable out-of-pocket expenses incurred in attending meetings of the Board or any committee thereof. An employee of Vigilant Compliance, LLC serves as CCO of the Trust. Vigilant Compliance, LLC is compensated for the services provided to the Trust, and such compensation is determined by the Board. For the fiscal year ended August 31, 2024, Vigilant Compliance, LLC received \$875,000 in the aggregate from all series of the Trust and The RBB Fund, Inc. (together, “Fund Complex”) for its services. For the fiscal year ended August 31, 2024, Vigilant Compliance, LLC did not receive any fees from the Fund because the Fund had not commenced operations prior to the date of this SAI. Employees of the Trust serve as President, Chief Financial Officer, Chief Operating Officer, Secretary and Director of Marketing & Business Development, and are compensated for services provided. For the fiscal year ended August 31, 2024, each of the following members of the Board and the President, Chief Financial Officer, Chief Operating Officer, Secretary and Director of Marketing & Business Development received compensation from the Fund and the Fund Complex in the following amounts:

Name of Trustee/Officer	Aggregate Compensation from the Fund⁽¹⁾	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Total Compensation From Fund Complex Paid to Trustees or Officers
Independent Trustees:			
Julian A. Brodsky, Trustee ⁽²⁾	\$0	N/A	\$137,250
Gregory P. Chandler, Trustee	\$0	N/A	\$311,000
Lisa A. Dolly, Trustee	\$0	N/A	\$296,000
Nicholas A. Giordano, Trustee	\$0	N/A	\$291,000
Arnold M. Reichman, Trustee and Chair	\$0	N/A	\$397,500
Robert A. Straniere, Trustee ⁽³⁾	\$0	N/A	\$274,750
Martha A. Tirinnanzi, Trustee ⁽⁴⁾	\$0	N/A	\$177,250
Interested Trustees:			
Robert Sablowsky, Trustee and Vice Chair	\$0	N/A	\$370,250
Brian T. Shea, Trustee	\$0	N/A	\$300,500
Officers:			
Steven Plump, President	\$0	N/A	\$308,667
James G. Shaw, Chief Financial Officer, Chief Operating Officer and Secretary	\$0	N/A	\$381,883
Craig Urciuoli, Director of Marketing & Business Development	\$0	N/A	\$319,178

- (1) The Fund had not commenced operations prior to the date of this SAI.
(2) Mr. Brodsky retired from his role as a Trustee effective February 2024.
(3) Mr. Straniere retired from his role as a Trustee effective January 2025.
(4) Ms. Tirinnanzi began serving as a Trustee effective January 1, 2024.

Each compensated Trustee is entitled to participate in the Trust’s deferred compensation plan (the “DC Plan”). Under the DC Plan, a compensated Trustee may elect to defer all or a portion of his or her compensation and have the deferred compensation treated as if it had been invested by the Trustee in shares of one or more of the portfolios of the Fund Complex. The amount paid to the Trustees under the DC Plan will be determined based upon the performance of such investments.

As of December 31, 2024, the Independent Trustees and their respective immediate family members (spouse or dependent children) did not own beneficially or of record any securities of the Trust’s investment advisers or distributor, or of any person directly or indirectly controlling, controlled by, or under common control with the investment advisers or distributor.

Trustee Emeritus Program

The Board has created a position of Trustee Emeritus, whereby an incumbent Trustee who has attained at least the age of 75 and completed a minimum of fifteen years of service as a Trustee or as a director of The RBB Fund, Inc., may, in the sole discretion of the Nominating and Governance Committee of the Trust (“Committee”), be recommended to the full Board to serve as Trustee Emeritus.

A Trustee Emeritus that has been approved as such receives an annual fee in an amount equal to up to 50% of the annual base compensation paid to a Trustee. Compensation will be determined annually by the Committee and the Board with respect to each Trustee Emeritus. In addition, a Trustee Emeritus will be reimbursed for any expenses incurred in connection with their service, including expenses of travel and lodging incurred in attendance at Board/Committee meetings. A Trustee Emeritus will continue to receive relevant materials concerning the Fund and will be available to consult with the Trustees at reasonable times as requested. However, a Trustee Emeritus does not have any voting rights at Board meetings and is not subject to election by shareholders of the Fund.

A Trustee Emeritus will be permitted to serve in such capacity from year to year at the pleasure of the Committee and the Board for up to three years. Effective February 2024, Julian Brodsky serves as a Trustee Emeritus of the Trust. Effective January 2025, Robert Straniere serves as a Trustee Emeritus of the Trust.

For the fiscal year ended August 31, 2024, Mr. Brodsky received compensation for his role as a Trustee Emeritus in the following amounts:

Aggregate Compensation from the Fund ⁽¹⁾	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From Fund Complex
\$0	N/A	N/A	\$43,750

⁽¹⁾ The Fund had not commenced operations prior to the date of this SAI.

CODE OF ETHICS

The Trust, Adviser, Sub-Adviser, and Trading Adviser have each adopted a code of ethics (“Code of Ethics”) pursuant to Rule 17j-1 under the 1940 Act, which governs personal securities trading by their respective personnel. Each Code of Ethics permits such individuals to purchase and sell securities, including securities that are purchased, sold, or held by the Fund, but only subject to certain conditions designed to ensure that purchases and sales by such individuals do not adversely affect the Fund’s investment activities.

PRINCIPAL HOLDERS

Any person owning, directly or indirectly, more than 25% of the outstanding shares of the Fund is presumed to control the Fund. Principal holders are persons who own 5% or more of the outstanding shares of the Fund. No principal shareholder information is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Because the Fund had not commenced operations prior to the date of this SAI, the Trustees and officers of the Trust as a group owned none of the outstanding shares of the Fund.

INVESTMENT ADVISORY AGREEMENT

Investment Advisory Agreement

Clearbrook Investment Consulting LLC, a Delaware limited liability company, serves as the investment adviser to the Fund. The Adviser’s principal place of business is located at 21 West 46th Street, Suite 1507, New York, New York 10036. The Adviser is registered as an investment adviser with the SEC. The Adviser is controlled by Clearbrook LLC and its affiliates.

The Adviser provides investment advisory services to the Fund pursuant to the terms of an Investment Advisory Agreement (the “Advisory Agreement”) between the Trust and the Adviser. After the initial two year-term, the Advisory Agreement may be continued in effect from year to year with the approval of (1) the Board or (2) vote of a majority (as defined by the 1940 Act) of the outstanding voting securities of the Fund, provided that in either event the continuance must also be approved by a majority of the Independent Trustees by vote cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement terminates automatically in the event of its assignment, as defined in the 1940 Act and the rules thereunder.

Subject to the supervision of the Board, the Adviser will provide for the overall management of the Fund including (i) the provision of a continuous investment program for the Fund, including investment research and management with respect to all securities, investments, cash and cash equivalents, (ii) the determination from time to time of what securities and other investments will be purchased, retained, or sold by the Fund, and (iii) the placement from time to time of orders for all purchases and sales made for the Fund. The Adviser will provide the services rendered by it in accordance with the Fund’s investment objective, restrictions and policies as stated in the Prospectus and in this SAI.

Under the terms of the Advisory Agreement, the Fund compensates the Adviser for its services at the at the annual rate of 0.75% (75 basis points) of its average daily net assets, payable monthly in arrears.

No advisory fee information is provided since the Fund had not commenced operations prior to the date of this SAI.

Investment Sub-Advisory Agreement

The Trust and the Adviser intend to submit an application with the SEC for an exemptive order with respect to the Fund that would permit the Adviser to engage or terminate a sub-adviser or trading adviser, and to enter into and materially amend an existing sub-advisory or trading advisory agreement, upon the approval of the Board, without obtaining shareholder approval. This requested exemptive relief has been approved by the Board and the Fund’s initial shareholder. Consequently, if approved by the SEC, under the exemptive order, the Adviser would have the right to hire, terminate and replace sub-advisers and trading advisers when the Board and the Adviser feel that a change would benefit the Fund. The exemptive order is expected to enable the Fund to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approval of sub-advisory and trading advisory agreements. There is no guarantee that the SEC will grant the requested exemptive order.

Mitsubishi UFJ Trust and Banking Corporation, a corporation organized under the laws of Japan, serves as the investment sub-adviser to the Fund. The Sub-Adviser’s principal place of business is located at 1-4-5, Marunouchi, Chiyoda-ku, Tokyo, Japan 100-8212. The Sub-Adviser is registered as an investment adviser with the SEC. The Sub-Adviser is a 100% owned subsidiary of Mitsubishi UFJ Financial Group, Inc., a Japanese financial services firm.

The investment sub-advisory agreement between the Adviser and the Sub-Adviser (the “Sub-Advisory Agreement”) provides that the Sub-Adviser will advise the Adviser concerning the coordination of the investment and reinvestment of the Fund’s portfolio in accordance with the Fund’s objective, policies and restrictions and any investment guidelines established by the Adviser. The Sub-Adviser will, subject to the supervision of the Adviser, provide advice related to the composition of the assets of the Fund. The Sub-Adviser is required to furnish at its own expense all investment facilities necessary to perform its obligations under the Sub-Advisory Agreement.

Generally, the Sub-Advisory Agreement may be terminated without penalty by vote of the Board or by vote of a majority of the outstanding voting securities of the Fund, upon 60 days’ written notice, or by the Adviser or Sub-Adviser on 60 days’ prior written notice to the Trust and other party. The Sub-Advisory Agreement terminates automatically in the event of an assignment (as defined in the 1940 Act), or upon termination of the Advisory Agreement. The Sub-Advisory Agreement will also terminate upon written notice to the other party that the other party is in material breach of this Agreement.

For its services, the Sub-Adviser is entitled to a fee from the Adviser.

No sub-advisory fee information is provided since the Fund had not commenced operations prior to the date of this SAI.

The Sub-Advisory Agreement provides that the Sub-Adviser shall not be protected against any liability to the Trust by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of its respective duties. The Adviser and the Sub-Adviser each agree to indemnify the other against any claim against, loss or liability to such other party (including reasonable attorneys' fees) arising out of any action on the part of the indemnifying party which constitutes willful misfeasance, bad faith, or gross negligence in the performance of duties under the Sub-Advisory Agreement, or reckless disregard of the obligations and duties under the Sub-Advisory Agreement.

Trading Advisory Agreement

Exchange Traded Concepts, LLC, an Oklahoma limited liability company located at 10900 Hefner Pointe Drive, Suite 400, Oklahoma City, Oklahoma 73120, serves as the trading adviser to the Fund. The Trading Adviser is an SEC-registered investment adviser formed in 2018 and is majority owned by Cottonwood ETF Holdings LLC ("Cottonwood"), a holding vehicle with no other business activity. Cottonwood is majority owned by Richard Hogan and trusts controlled by Richard Hogan or for which Richard Hogan and family are the beneficiaries.

Subject to the general oversight of the Board and the Adviser, the Trading Adviser is responsible for trading portfolio securities for the Fund, including the purchase, retention and disposition of the securities and other assets of the Fund entrusted to it under the Trading Advisory Agreement (the "Trading Advisory Agreement"), in accordance with the Fund's investment objectives, policies and restrictions as stated in the Fund's Prospectus, this SAI, and the terms of the Trading Advisory Agreement. After the initial two year-term, the Trading Advisory Agreement may be continued in effect from year to year with the (1) annual approval of the Trust's board of trustees or (2) vote of a majority (as defined by the 1940 Act) of the outstanding voting securities of the Fund, provided that in either event the continuance must also be approved by a majority of the Independent Trustees by vote at a meeting called for the purpose of voting on such approval. The Trading Advisory Agreement terminates automatically in the event of its assignment, as defined in the 1940 Act and the rules thereunder.

For its services, the Trading Adviser is entitled to a fee from the Adviser.

No trading advisory fee information is provided since the Fund had not commenced operations prior to the date of this SAI.

The Trading Advisory Agreement provides that the Trading Adviser shall not be protected against any liability to the Trust or its shareholders by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of its respective duties. The Adviser and the Trading Adviser each agree to indemnify the other against any claim against, loss or liability to such other party (including reasonable attorneys' fees) arising out of any action on the part of the indemnifying party which constitutes willful misfeasance, bad faith, or gross negligence in the performance of duties under the Trading Advisory Agreement, or reckless disregard of the obligations and duties under the Trading Advisory Agreement.

PORTFOLIO MANAGERS

This section includes information about the Fund's portfolio managers, including information about other accounts managed, the dollar range of Fund shares owned, and how the portfolio managers are compensated.

The Sub-Adviser

Compensation. The Sub-Advisor implemented its Active Fund Manager System in April 2021 to better align portfolio manager evaluations and remuneration with long-term investment returns. This system aims to reflect the achievement of high returns over the long term in the evaluation and compensation process. The base salary is reviewed annually based on both Business impact and Qualitative criteria. Business impact includes the assets under management (AUM) and revenue generated by the team or fund, as well as contributions from the aspects of business plan, such as acquiring key investors through quality investment management. Qualitative criteria encompass contributions to product promotion, generating ideas for new products, human resource development, and compliance.

Bonuses are paid twice a year and are determined based on both quantitative and qualitative criteria. Quantitative criteria include portfolio returns over one year, three years, and/or five years. Qualitative criteria include the performance of each team's evaluation items. The weight of two criteria varies depending on the portfolio manager's job rank. Higher-ranked portfolio managers are evaluated more based on the long-term performance.

Other Accounts. In addition to the Fund, the portfolio managers are responsible for the day-to-day management of certain other accounts, as listed below. The information below is provided as of March 31, 2025.

Portfolio Manager; Other Accounts	Total Accounts		Accounts With Performance-Based Fees	
	Number	Assets	Number	Assets
Yoshiro Mizukami				
Registered Investment Companies	0	\$0	0	\$0
Other Pooled Investment Vehicles	2	\$149 million	0	\$0
Other Accounts	3	\$673 million	0	\$0
Yoshitaka Nagano				
Registered Investment Companies	0	\$0	0	\$0
Other Pooled Investment Vehicles	2	\$99 million	0	\$0
Other Accounts	1	\$151 million	0	\$0

Conflict of Interest. The Sub-Advisor has the responsibility to make sure the interests of clients are placed ahead of its or any portfolio manager's own investment interests. The Sub-Advisor conducts business in an honest, ethical, and fair manner. Full disclosure of all material facts and potential conflicts of interest is provided to clients prior to any services being conducted. A conflict of interest occurs when a portfolio manager's private interest or the interest of the Sub-Advisor interferes with the interests of the Sub-Advisor's clients. The Sub-Advisor has the responsibility to avoid all circumstances that might negatively affect or appear to affect its duty of complete loyalty to its clients. The Sub-Advisor will not engage in any conduct or act, directly or indirectly or through any other person that would be unlawful under the provisions of any rules and regulations.

Securities Ownership. The portfolio managers did not own any shares of the Fund as no shares of the Fund were outstanding prior to the date of this SAI.

UNDERWRITER

The Trust has entered into a distribution agreement (the “Distribution Agreement”) with Quasar Distributors, LLC (the “Distributor”), a wholly-owned subsidiary of Foreside Financial Group, LLC (d/b/a ACA Group), Three Canal Plaza, Suite 100, Portland, Maine 04101, pursuant to which the Distributor acts as the Fund’s principal underwriter and distributes shares. Shares are continuously offered for sale by the Distributor only in Creation Units. Each Creation Unit is generally made up of at least 10,000 shares. The Distributor will not distribute Shares in amounts less than a Creation Unit.

Under the Distribution Agreement, the Distributor, as agent for the Trust, will receive orders for the purchase and redemption of Creation Units, provided that any subscriptions and orders will not be binding on the Trust until accepted by the Trust. The Distributor will deliver prospectuses and, upon request, Statements of Additional Information to persons purchasing Creation Units and will maintain records of orders placed with it. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) and a member of the Financial Industry Regulatory Authority (“FINRA”).

The Distributor may also enter into agreements with securities dealers (“Soliciting Dealers”) who will solicit purchases of Creation Units of shares. Such Soliciting Dealers may also be Authorized Participants (as discussed in “Procedures for Creation of Creation Units” below) or DTC Participants.

The Distribution Agreement has an initial term of up to two years and will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund’s outstanding voting securities and, in either case, by a majority of the Independent Trustees. The Distribution Agreement is terminable without penalty by the Trust, on behalf of the Fund, on 60 days’ written notice when authorized either by a majority vote of the Fund’s shareholders or by vote of a majority of the Board, including a majority of the Independent Trustees of the Trust, or by the Distributor on 60 days’ written notice, and will automatically terminate in the event of its “assignment,” as defined in the 1940 Act.

PURCHASE AND REDEMPTION OF CREATION UNITS

Purchase and Issuance of Creation Units

The Trust issues and sells shares of the Fund only: (i) in Creation Units on a continuous basis through the Distributor, without a sales load (but subject to transaction fees), at their NAV next determined after receipt of an order, on any Business Day, in proper form pursuant to the terms of the Authorized Participant Agreement (“Participant Agreement”); or (ii) pursuant to the Dividend Reinvestment Service (defined below). The NAV of the Fund’s shares is calculated each business day as of the close of regular trading on the Exchange, generally 4:00 p.m., Eastern Time. The Fund will not issue fractional Creation Units. A Business Day is any day on which the Exchange is open for business.

FUND DEPOSIT. The consideration for purchase of a Creation Unit of the Fund generally consists of the in-kind deposit of a designated portfolio of securities (the “Deposit Securities”) per each Creation Unit, plus the Cash Component (defined below), computed as described below. Notwithstanding the foregoing, the Trust reserves the right to permit or require the substitution of a “cash in lieu” amount (“Deposit Cash”) to be added to the Cash Component to replace any Deposit Security. When accepting purchases of Creation Units for all or a portion of Deposit Cash, the Fund may incur additional costs associated with the acquisition of Deposit Securities that would otherwise be provided by an in-kind purchaser. These additional costs associated with the acquisition of Deposit Securities (“Non-Standard Charges”) may be recoverable from the purchaser of creation units.

Together, the Deposit Securities or Deposit Cash, as applicable, and the Cash Component constitute the “Fund Deposit,” which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund. The “Cash Component” is an amount equal to the difference between the NAV of the Fund’s shares (per Creation Unit) and the market value of the Deposit Securities or Deposit Cash, as applicable. If the Cash Component is a positive number (*i.e.*, the NAV per Creation Unit exceeds the market value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component will be such positive amount. If the Cash Component is a negative number (*i.e.*, the NAV per Creation Unit is less than the market value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such negative amount and the creator will be entitled to receive cash in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the market value of the Deposit Securities or Deposit Cash, as applicable. Computation of the Cash Component excludes any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities, if applicable, which will be the sole responsibility of the Authorized Participant (as defined below).

The Fund, through National Securities Clearing Corporation (“NSCC”), makes available on each Business Day, immediately prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern time), the list of the names and the required number of shares of each Deposit Security or the required amount of Deposit Cash, as applicable, to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for the Fund. Such Fund Deposit is subject to any applicable adjustments as described below, in order to effect purchases of Creation Units of the Fund until such time as the next-announced composition of the Deposit Securities or the required amount of Deposit Cash, as applicable, is made available.

The identity and number of shares of the Deposit Securities or the amount of Deposit Cash, as applicable, required for the Fund Deposit for the Fund changes from time to time as rebalancing adjustments and corporate action events are reflected by the Adviser. The composition of the Deposit Securities will change in response to adjustments to the weighting or composition of the securities constituting the Fund’s portfolio.

The Trust reserves the right to permit or require the substitution of an amount of cash (*i.e.*, a “cash in lieu” amount) to replace any Deposit Security, which will be added to the Deposit Cash, if applicable, and the Cash Component, including, without limitation, in situations where the Deposit Security: (i) may not be available in sufficient quantity for delivery; (ii) may not be eligible for transfer through the systems of DTC for corporate securities and municipal securities; (iii) may not be eligible for trading by an Authorized Participant (as defined below) or the investor for which it is acting; (iv) would be restricted under the securities laws or where the delivery of the Deposit Security to the Authorized Participant would result in the disposition of the Deposit Security by the Authorized Participant becoming restricted under the securities laws; or (v) in certain other situations (collectively, “custom orders”).

CASH PURCHASE METHOD. The Trust may at its discretion permit full or partial cash purchases of Creation Units of the Fund in instances permitted by the exemptive relief the Adviser is relying on in offering the Fund. When full or partial cash purchases of Creation Units are available or specified for the Fund, they will be effected in essentially the same manner as in-kind purchases thereof. In the case of a full or partial cash purchase, the Authorized Participant must pay the cash equivalent of the Deposit Securities it would otherwise be required to provide through an in-kind purchase, plus the same Cash Component required to be paid by an in-kind purchaser together with a Creation Transaction Fee and Non-Standard Charges, as may be applicable.

PROCEDURES FOR PURCHASE OF CREATION UNITS. To be eligible to place orders with the Distributor to purchase a Creation Unit of the Fund, an entity must be (i) a “Participating Party”, *i.e.*, a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the “Clearing Process”), a clearing agency that is registered with the SEC; or (ii) a DTC Participant. In addition, each Participating Party or DTC Participant (each, an “Authorized Participant” or “AP”) must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (“Transfer Agent” or “Fund Services”) and the Trust, with respect to purchases and redemptions of Creation Units. Each AP will agree, pursuant to the terms of a Participant Agreement, on behalf of itself or any investor on whose behalf it will act, to certain conditions, including that it will pay to the Trust an amount of cash sufficient to pay the Cash Component together with the Creation Transaction Fee (defined below) and any other applicable fees and taxes. The Adviser may retain all or a portion of the Transaction Fee to the extent the Adviser bears the expenses that otherwise would be borne by the Trust in connection with the purchase of a Creation Unit, which the Transaction Fee is designed to cover.

All orders to purchase shares directly from the Fund must be placed for one or more Creation Units in the manner set forth in the Participant Agreement (the “Cut-Off Time”). The date on which an order to purchase Creation Units (or an order to redeem Creation Units, as set forth below) is received and accepted is referred to as the “Order Placement Date.”

An AP may require an investor to make certain representations or enter into agreements with respect to the order (e.g., to provide for payments of cash, when required). Investors should be aware that their particular broker may not have executed a Participant Agreement and that, therefore, orders to purchase shares directly from the Fund in Creation Units have to be placed by the investor’s broker through an AP that has executed a Participant Agreement. In such cases there may be additional charges to such investor. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement and only a small number of such APs may have international capabilities.

On days when the Exchange closes earlier than normal, the Fund may require orders to create Creation Units to be placed earlier in the day. In addition, if a market or markets on which the Fund’s investments are primarily traded is closed on any day, the Fund will not accept orders on such day. Orders must be transmitted by an AP by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement and in accordance with the AP Handbook. With respect to the Fund, the Distributor will notify the Custodian of such order. The Custodian will then provide such information to the appropriate local sub-custodian(s). Those placing orders through an AP should allow sufficient time to permit proper submission of the purchase order to the Distributor by the Cut-Off Time on the Business Day on which the order is placed. Economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Distributor or an AP.

Fund Deposits must be delivered by an AP through the Federal Reserve System (for cash) or through DTC (for corporate securities), through a subcustody agent (for foreign securities) and/or through such other arrangements allowed by the Trust or its agents. With respect to foreign Deposit Securities, the Custodian will cause the subcustodian of such Fund to maintain an account into which the AP will deliver, on behalf of itself or the party on whose behalf it is acting, such Deposit Securities (or Deposit Cash for all or a part of such securities, as permitted or required), with any appropriate adjustments as advised by the Trust. Foreign Deposit Securities must be delivered to an account maintained at the applicable local subcustodian. The Fund Deposit transfer must be ordered by the AP in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities or Deposit Cash, as applicable, to the account of the Fund or its agents by no later than the settlement date. All questions as to the number of Deposit Securities or Deposit Cash to be delivered, as applicable, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities or cash, as applicable, will be determined by the Trust, whose determination will be final and binding. The amount of cash represented by the Cash Component must be transferred directly to the Custodian through the Federal Reserve Bank wire transfer system in a timely manner so as to be received by the Custodian no later than the settlement date. If the Cash Component and the Deposit Securities or Deposit Cash, as applicable, are not received in a timely manner by the settlement date, the creation order may be cancelled. Upon written notice to the Distributor, such canceled order may be resubmitted the following Business Day using the Fund Deposit as newly constituted to reflect the then current NAV of the Fund.

The order will be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to the Cut-Off Time and the federal funds in the appropriate amount are deposited by 2:00 p.m., Eastern time, with the Custodian on the settlement date. If the order is not placed in proper form as required, or federal funds in the appropriate amount are not received by 2:00 p.m., Eastern time on the settlement date, then the order may be deemed to be rejected and the AP will be liable to the Fund for losses, if any, resulting therefrom. A creation request is considered to be in “proper form” if all procedures set forth in the Participant Agreement, AP Handbook and this SAI are properly followed.

ISSUANCE OF A CREATION UNIT. Except as provided herein, Creation Units will not be issued until the transfer of good title to the Trust of the Deposit Securities or payment of Deposit Cash, as applicable, and the payment of the Cash Component have been completed. When the subcustodian has confirmed to the Custodian that the required Deposit Securities (or the cash value thereof) have been delivered to the account of the relevant subcustodian or subcustodians, the Distributor and the Adviser will be notified of such delivery, and the Trust will issue and cause the delivery of the Creation Units. The delivery of Creation Units so created generally will occur no later than the third Business Day following the day on which the purchase order is deemed received by the Distributor. However, the Fund reserves the right to settle Creation Unit transactions on a basis other than the third Business Day following the day on which the purchase order is deemed received by the Distributor in order to accommodate foreign market holiday schedules, to account for different treatment among foreign and U.S. markets of dividend record dates and ex-dividend dates (that is the last day the holder of a security can sell the security and still receive dividends payable on the security), and in certain other circumstances. The AP will be liable to the Fund for losses, if any, resulting from unsettled orders.

Creation Units may be purchased in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the shares on the date the order is placed in proper form since in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) an additional amount of cash equal to a percentage of the market value as set forth in the Participant Agreement, of the undelivered Deposit Securities (the “Additional Cash Deposit”), which will be maintained in a separate non-interest bearing collateral account. An additional amount of cash will be required to be deposited with the Trust, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to the applicable percentage, as set forth in the Participant Agreement, of the daily marked to market value of the missing Deposit Securities. The Participant Agreement will permit the Trust to buy the missing Deposit Securities at any time. APs will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the market value of such Deposit Securities on the day the purchase order was deemed received by the Distributor plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by the Custodian or purchased by the Trust and deposited into the Trust. In addition, a Transaction Fee as set forth below under “Creation Transaction Fee” will be charged in all cases, unless otherwise advised by the Fund, and Non- Standard Charges may also apply. The delivery of Creation Units so created generally will occur no later than the settlement date.

ACCEPTANCE OF ORDERS OF CREATION UNITS. The Trust reserves the right to reject an order for Creation Units transmitted to it by the Distributor in respect of the Fund including, without limitation, if (a) the order is not in proper form; (b) the Deposit Securities or Deposit Cash, as applicable, delivered by the Participant are not as disseminated through the facilities of the NSCC for that date by the Custodian; (c) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of the Fund; (d) the acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; or (e) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Trust, be unlawful.

CREATION TRANSACTION FEE. A purchase (*i.e.*, creation) transaction fee is imposed for the transfer and other transaction costs associated with the purchase of Creation Units, and investors will be required to pay a Creation Transaction Fee regardless of the number of Creation Units created in the transaction. The Fund may adjust the creation transaction fee from time to time based upon actual experience. In addition, the Fund may impose a Non-Standard Charge of up to 2% of the value of the creation transactions for cash creations, non- standard orders, or partial cash purchases for the Fund. The Fund may adjust the Non-Standard Charge from time to time based upon actual experience. Investors who use the services of an AP, broker or other such intermediary may be charged a fee for such services, which may include an amount for the Creation Transaction Fee and Non-Standard Charges. Investors are responsible for the costs of transferring the securities constituting the Deposit Securities to the account of the Trust. The Adviser may retain all or a portion of the Transaction Fee to the extent the Adviser bears the expenses that otherwise would be borne by the Trust in connection with the purchase of a Creation Unit, which the Transaction Fee is designed to cover. The standard Creation Transaction Fee for the Fund is \$750.

RISKS OF PURCHASING CREATION UNITS. There are certain legal risks unique to investors purchasing Creation Units directly from the Fund. Because the Fund’s shares may be issued on an ongoing basis, a “distribution” of shares could be occurring at any time. Certain activities that a shareholder performs as a dealer could, depending on the circumstances, result in the shareholder being deemed a participant in the distribution in a manner that could render the shareholder a statutory underwriter and subject to the prospectus delivery and liability provisions of the Securities Act. For example, a shareholder could be deemed a statutory underwriter if it purchases Creation Units from the Fund, breaks them down into the constituent shares, and sells those shares directly to customers, or if a shareholder chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary-market demand for shares. Whether a person is an underwriter depends upon all of the facts and circumstances pertaining to that person’s activities, and the examples mentioned here should not be considered a complete description of all the activities that could cause a shareholder to be deemed an underwriter.

Dealers who are not “underwriters” but are participating in a distribution (as opposed to engaging in ordinary secondary-market transactions), and thus dealing with the Fund’s shares as part of an “unsold allotment” within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3)(C) of the Securities Act.

Redemption of Creation Units

Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Fund through the Transfer Agent and only on a Business Day. EXCEPT UPON LIQUIDATION OF THE FUND, THE TRUST WILL NOT REDEEM SHARES IN AMOUNTS LESS THAN CREATION UNITS. Investors must accumulate enough shares in the secondary market to constitute a Creation Unit in order to have such shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of shares to constitute a redeemable Creation Unit.

With respect to the Fund, the Custodian, through the NSCC, makes available immediately prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern time) on each Business Day, the list of the names and share quantities of the Fund’s portfolio securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day (“Fund Securities”). Fund Securities received on redemption may not be identical to Deposit Securities.

Redemption proceeds for a Creation Unit are paid either in-kind or in cash, or combination thereof, as determined by the Trust. With respect to in-kind redemptions of the Fund, redemption proceeds for a Creation Unit will consist of Fund Securities as announced by the Custodian on the Business Day of the request for redemption received in proper form plus cash in an amount equal to the difference between the NAV of the shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Fund Securities (the “Cash Redemption Amount”), less any fixed redemption transaction fee as set forth below and any Non-Standard Charges. If the Fund Securities have a value greater than the NAV of the shares, a compensating cash payment equal to the differential is required to be made by or through an AP by the redeeming shareholder. Notwithstanding the foregoing, at the Trust’s discretion, an AP may receive the corresponding cash value of the securities in lieu of the in-kind securities value representing one or more Fund Securities.

CASH REDEMPTION METHOD. Although the Trust does not ordinarily permit full or partial cash redemptions of Creation Units of the Fund, when full or partial cash redemptions of Creation Units are available or specified for the Fund, they will be effected in essentially the same manner as in-kind redemptions thereof. In the case of full or partial cash redemptions, the AP will receive the cash equivalent of the Fund Securities it would otherwise receive through an in-kind redemption, plus the same Cash Amount to be paid to an in-kind redeemer. The Fund may incur costs such as brokerage costs or taxable gains or losses that the Fund might not have incurred if the redemption had been made in-kind. These costs may decrease the Fund’s NAV to the extent that the costs are not offset by a transaction fee payable by an AP. Shareholders may be subject to tax on gains they would not otherwise have been subject to and/or at an earlier date than if the Fund had effected redemptions wholly on an in-kind basis.

REDEMPTION TRANSACTION FEES. A redemption transaction fee may be imposed for the transfer and other transaction costs associated with the redemption of Creation Units, and APs will be required to pay a Redemption Transaction Fee regardless of the number of Creation Units created in the transaction. The redemption transaction fee is the same no matter how many Creation Units are being redeemed pursuant to any one redemption request. The Fund may adjust the redemption transaction fee from time to time based upon actual experience. In addition, the Fund may impose a Non-Standard Charge of up to 2% of the value of a redemption transaction for cash redemptions, non-standard orders, or partial cash redemptions for the Fund. Investors who use the services of an AP, broker or other such intermediary may be charged a fee for such services which may include an amount for the Redemption Transaction Fees and Non-Standard Charges. Investors are responsible for the costs of transferring the securities constituting the Fund Securities to the account of the Trust. The Non-Standard Charges are payable to the Fund as it incurs costs in connection with the redemption of Creation Units, the receipt of Fund Securities and the Cash Redemption Amount and other transactions costs. The standard Redemption Transaction Fee for the Fund is \$750.

PROCEDURES FOR REDEMPTION OF CREATION UNITS. Orders to redeem Creation Units must be submitted in proper form to the Transfer Agent prior to the time as set forth in the Participant Agreement. A redemption request is considered to be in “proper form” if (i) an AP has transferred or caused to be transferred to the Trust’s Transfer Agent the Creation Unit(s) being redeemed through the book- entry system of DTC so as to be effective by the time as set forth in the Participant Agreement and (ii) a request in form satisfactory to the Trust is received by the Transfer Agent from the AP on behalf of itself or another redeeming investor within the time periods specified in the Participant Agreement. If the Transfer Agent does not receive the investor’s shares through DTC’s facilities by the times and pursuant to the other terms and conditions set forth in the Participant Agreement, the redemption request will be rejected.

The AP must transmit the request for redemption, in the form required by the Trust, to the Transfer Agent in accordance with procedures set forth in the Authorized Participant Agreement. Investors should be aware that their particular broker may not have executed an Authorized Participant Agreement, and that, therefore, requests to redeem Creation Units may have to be placed by the investor’s broker through an AP which has executed an Authorized Participant Agreement. Investors making a redemption request should be aware that such request must be in the form specified by such AP. Investors making a request to redeem Creation Units should allow sufficient time to permit proper submission of the request by an AP and transfer of the shares to the Trust’s Transfer Agent; such investors should allow for the additional time that may be required to effect redemptions through their banks, brokers or other financial intermediaries if such intermediaries are not APs.

In connection with taking delivery of shares of Fund Securities upon redemption of Creation Units, a redeeming shareholder or AP acting on behalf of such Shareholder must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will be made within three business days of the trade date.

ADDITIONAL REDEMPTION PROCEDURES. In connection with taking delivery of shares of Fund Securities upon redemption of Creation Units, the AP must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will be made within three Business Days of the trade date. However, due to the schedule of holidays in certain countries, the different treatment among foreign and U.S. markets of dividend record dates and dividend ex-dates (that is the last date the holder of a security can sell the security and still receive dividends payable on the security sold), and in certain other circumstances, the delivery of in-kind redemption proceeds may take longer than three Business Days after the day on which the redemption request is received in proper form. If neither the redeeming Shareholder nor the AP acting on behalf of such redeeming Shareholder has appropriate arrangements to take delivery of the Fund Securities in the applicable foreign jurisdiction and it is not possible to make other such arrangements, or if it is not possible to effect deliveries of the Fund Securities in such jurisdiction, the Trust may, in its discretion, exercise its option to redeem such shares in cash, and the redeeming shareholder will be required to receive its redemption proceeds in cash.

If it is not possible to make other such arrangements, or it is not possible to effect deliveries of the Fund Securities, the Trust may in its discretion exercise its option to redeem such shares in cash, and the redeeming investor will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash that the Fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its shares based on the NAV of shares of the relevant Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charge for requested cash redemptions specified above, to offset the Trust’s brokerage and other transaction costs associated with the disposition of Fund Securities). The Fund may also, in their sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities but does not differ in NAV.

Redemptions of shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and the Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws. An AP or an investor for which it is acting subject to a legal restriction with respect to a particular security included in the Fund Securities applicable to the redemption of Creation Units may be paid an equivalent amount of cash. The AP may request the redeeming investor of the shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment. Further, an AP that is not a “qualified institutional buyer,” (“QIB”) as such term is defined under Rule 144A of the Securities Act, will not be able to receive Fund Securities that are restricted securities eligible for resale under Rule 144A. An AP may be required by the Trust to provide a written confirmation with respect to QIB status in order to receive Fund Securities.

Because the portfolio securities of the Fund may trade on the relevant exchange(s) on days that the Exchange is closed or are otherwise not Business Days for such Fund, shareholders may not be able to redeem their shares of the Fund, or to purchase or sell shares of such Fund on the Exchange, on days when the NAV of such Fund could be significantly affecting by events in the relevant foreign markets.

The right of redemption may be suspended or the date of payment postponed with respect to the Fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the shares of the Fund or determination of the NAV of the shares is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

PORTFOLIO HOLDINGS INFORMATION

The Fund discloses its full portfolio holdings, as of the close of business the prior day, each day before the opening of trading on the Exchange at www.mufgetf.com.

DETERMINATION OF NET ASSET VALUE

In accordance with procedures adopted by the Board, the NAV per share of the Fund is calculated by determining the value of the net assets attributed to the Fund and dividing by the number of outstanding shares of the Fund. All securities are valued on each Business Day as of the close of regular trading on the New York Stock Exchange (“NYSE”) (normally, but not always, 4:00 p.m. Eastern Time) or such other time as the NYSE or National Association of Securities Dealers Automated Quotations System (“NASDAQ”) market may officially close. The term “Business Day” means any day the NYSE is open for trading, which is Monday through Friday except for holidays. The NYSE is generally closed on the following holidays: New Year’s Day (observed), Martin Luther King, Jr. Day, Washington’s Birthday (observed), Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

The time at which transactions and shares are priced and the time by which orders must be received may be changed in case of an emergency or if regular trading on the NYSE is stopped at a time other than 4:00 p.m. Eastern Time. The Trust reserves the right to reprocess purchase, redemption and exchange transactions that were initially processed at a NAV other than the Fund’s official closing NAV (as the same may be subsequently adjusted), and to recover amounts from (or distribute amounts to) shareholders based on the official closing NAV. The Trust reserves the right to advance the time by which purchase and redemption orders must be received for same business day credit as otherwise permitted by the SEC. In addition, the Fund may compute its NAV as of any time permitted pursuant to any exemption, order or statement of the SEC or its staff.

The Board has adopted a pricing and valuation policy for use by the Fund and its Valuation Designee (defined below) in calculating the Fund’s NAV. Pursuant to Rule 2a-5 under the 1940 Act, the Fund has designated the Adviser as its “Valuation Designee” to perform all of the fair value determinations as well as to perform all of the responsibilities that may be performed by the Valuation Designee in accordance with Rule 2a-5. The Valuation Designee is authorized to make all necessary determinations of the fair values of portfolio securities and other assets for which market quotations are not readily available or if it is deemed that the prices obtained from brokers and dealers or independent pricing services are unreliable. Prices are generally determined using readily available market prices. Subject to the approval of the Board, the Fund may employ outside organizations, which may use a matrix or formula method that takes into consideration market indices, matrices, yield curves and other specific adjustments in determining the approximate market value of portfolio investments. This may result in the investments being valued at a price that differs from the price that would have been determined had the matrix or formula method not been used. All cash, receivables, and current payables are carried on the Fund’s books at their face value. Other assets, if any, are valued at fair value as determined in good faith by the Valuation Designee under the direction of the Board.

The procedures used by any pricing service and its valuation results are reviewed by the officers of the Trust under the general supervision of the Board.

The Fund may hold portfolio securities that are listed on foreign exchanges. These securities may trade on weekends or other days when the Fund does not calculate NAV. As a result, the value of these investments may change on days when you cannot purchase or sell Fund shares.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

The following information supplements and should be read in conjunction with the section in the Fund's Prospectus titled "DIVIDENDS, DISTRIBUTIONS, AND TAXES." In addition, the following is only a summary of certain U.S. federal income tax considerations that generally affect the Fund and their shareholders. No attempt is made to present a comprehensive explanation of the tax treatment of the Fund or its shareholders, and the discussion here and in the Prospectus is not intended as a substitute for careful tax planning. Shareholders are urged to consult their tax advisors with specific reference to their own tax situations, including their state, local, and foreign tax liabilities.

It is the policy of the Trust each fiscal year to distribute substantially all of the Fund's net investment income (*i.e.*, generally, the income that it earns from dividends and interest on its investments, and any short-term capital gains, net of Fund expenses) and net capital gains (*i.e.*, the excess of the Fund's net long-term capital gains over its net short-term capital losses), if any, to its shareholders.

Dividend Reinvestment Service

The Fund will not make the DTC book-entry dividend reinvestment service available for use by beneficial owners for reinvestment of their cash proceeds, but certain individual broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by beneficial owners of the Fund through DTC Participants for reinvestment of their dividend distributions. Investors should contact their brokers to ascertain the availability and description of these services. Beneficial owners should be aware that each broker may require investors to adhere to specific procedures and timetables in order to participate in the dividend reinvestment service and investors should ascertain from their brokers such necessary details. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares issued by the Fund at NAV. Distributions reinvested in additional shares of the Fund will nevertheless be taxable to beneficial owners acquiring such additional shares to the same extent as if such distributions had been received in cash.

Taxes – General

The discussions of the federal tax consequences in the Prospectus and this SAI are based on the Code, the regulations issued under it, and court decisions and administrative interpretations, each as in effect on the date of the Prospectus and this SAI, respectively. Future legislative or administrative changes or court decisions may significantly alter the statements included therein and herein, and any such changes or decisions may be retroactive. The Fund intends to elect to be, and intends to qualify each year for treatment as, a regulated investment company under Subchapter M of Subtitle A, Chapter 1, of the Code. As such, the Fund generally will be exempt from federal income tax on its net investment income and realized capital gains that it distributes to shareholders. To qualify for treatment as a regulated investment company, the Fund must meet three important tests each year.

First, the Fund must derive with respect to each taxable year at least 90% of its gross income from dividends, interest, certain payments with respect to securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, other income derived with respect to its business of investing in such stock, securities, or currencies, or net income derived from interests in qualified publicly traded partnerships.

Second, generally, at the close of each quarter of its taxable year, at least 50% of the value of the Fund's assets must consist of cash and cash items, U.S. government securities, securities of other regulated investment companies, and securities of other issuers (as to which the Fund has not invested more than 5% of the value of its total assets in securities of such issuer and as to which the Fund does not hold more than 10% of the outstanding voting securities of such issuer), and no more than 25% of the value of the Fund's total assets may be invested in the securities of (other than U.S. government securities and securities of other regulated investment companies) (1) any one issuer, (2) two or more issuers that the Fund controls and that are engaged in the same or similar trades or businesses or related trades or businesses, or (3) one or more qualified publicly traded partnerships.

Third, the Fund must distribute an amount equal to at least the sum of 90% of its investment company taxable income (net investment income and the excess of net short-term capital gain over net long-term capital loss) before taking into account any deduction for dividends paid, and 90% of its tax-exempt income, if any, for the year.

The Fund intends to comply with these requirements. If the Fund were to fail to make sufficient distributions, it could be liable for corporate income tax (which may include interest or penalties) and for excise tax (as discussed below) in respect of the shortfall or, if the shortfall is large enough and the Fund does not satisfy the 90% distribution requirement above, the Fund could be disqualified as a regulated investment company. If for any taxable year the Fund were not to qualify as a regulated investment company, all its taxable income would be subject to tax at regular corporate rates without any deduction for distributions to shareholders. In that event, taxable shareholders would recognize dividend income on distributions (including distributions of capital gains) to the extent of the Fund's current and accumulated earnings and profits, and corporate shareholders could be eligible for the dividends-received deduction.

The Code imposes a nondeductible 4% excise tax on regulated investment companies that fail to distribute each year an amount equal to specified percentages of their ordinary taxable income and capital gain net income (excess of capital gains over capital losses). The Fund intends to make sufficient distributions or deemed distributions each year to avoid liability for this excise tax.

The Fund may elect to retain its net capital gain or a portion thereof for investment and be taxed at corporate rates on the amount retained. In such case, the Fund may designate the retained amount as undistributed capital gains in a written notice to its shareholders, who will be treated as if each received a distribution of its pro rata share of such gain, with the result that each shareholder will (i) be required to report its pro rata share of such gain on its tax return as long-term capital gain, (ii) receive a refundable tax credit for its pro rata share of tax paid by the Fund on the gain and (iii) increase the tax basis for its shares by an amount equal to the deemed distribution less the tax credit.

Certain of the Fund's hedging and derivatives transactions are subject to special and complex U.S. federal income tax provisions that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (ii) convert lower-taxed long-term capital gain into higher-taxed short-term capital gain or ordinary income, (iii) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited), (iv) cause the Fund to recognize income or gain without a corresponding receipt of cash, (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur, (vi) adversely alter the intended characterization of certain complex financial transactions and (vii) produce income that will not be treated as qualifying income for purposes of the 90% gross income test described above. These rules could therefore affect the character, amount and timing of distributions to shareholders and the Fund's status as a regulated investment company. The Fund will monitor its transactions and may make certain tax elections in order to mitigate the effect of these provisions.

The Fund's investment in non-U.S. securities may be subject to non-U.S. withholding taxes. In that case, the Fund's yield on those securities would be decreased. Shareholders will generally not be entitled to claim a credit or deduction with respect to any non-U.S. taxes paid by the Fund.

Loss Carryforwards

For federal income tax purposes, the Fund is generally permitted to carry forward a net capital loss in any year to offset its own capital gains, if any, during subsequent years.

Exchange of Stocks and Securities for Shares

Certain initial investors in the Fund may be permitted to contribute a diversified portfolio of stocks and securities to the Fund in exchange for shares of the Fund, in a transaction that is expected to qualify as a tax-deferred contribution under Section 351 of the Code. If the foregoing transaction does not meet the requirements of Section 351 of the Code, contributing shareholders would recognize gain or loss based on the difference between the value of the Fund shares that they receive and their basis in the stocks and securities that they exchange for Fund shares.

State and Local Taxes

Although the Fund intends to qualify as a regulated investment company and to be relieved of all or substantially all federal income taxes, depending upon the extent of its activities in states and localities in which its offices are maintained, in which its agents or independent contractors are located or in which it is otherwise deemed to be conducting business, the Fund may be subject to the tax laws of such states or localities.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Subject to the general supervision of the Board and the Adviser, the Sub-Adviser is responsible for providing advice to buy and sell securities for the Fund. The Adviser has engaged the Trading Adviser to perform certain responsibilities with respect to portfolio transactions and brokerage, as described below. On a daily basis, the Trading Adviser may trade portfolio securities on behalf of the Fund, and may select broker-dealers to execute purchase and sale transactions. Purchases and sales of securities on a stock exchange are effected through brokers who charge a commission for their services. In the OTC market, securities are generally traded on a "net" basis, with dealers acting as principal for their own accounts without a stated commission, although the price of the security usually includes a profit to the dealer. In underwritten offerings, securities are purchased at a fixed price, which includes an amount of compensation to the underwriter, generally referred to as the underwriter's concession or discount. Certain money market instruments may be purchased directly from an issuer, in which case no commission or discounts are paid.

In addition, the Trading Adviser may place a combined order for two or more accounts they manage, including the Fund, engaged in the purchase or sale of the same security if, in its judgment, joint execution is in the best interest of each participant and will result in best price and execution. Transactions involving commingled orders are allocated by the Trading Adviser in a manner that it deems equitable to, and consistent with its fiduciary obligations to, each participant under the circumstances. In making such allocations, the main factors considered are the respective investment objectives, the relative size of portfolio holdings of the same or comparable securities, the availability of cash for investment, the size of investment commitments generally held, and the opinions of the persons responsible for managing the Fund and the other client accounts. This procedure may, under certain circumstances, have an adverse effect on the Fund because the joint execution of orders could adversely affect the price or volume of the security that the Fund may obtain. The policy of the Fund regarding purchases and sales of securities is that primary consideration will be given to obtaining the most favorable executions of transactions. Consistent with this policy, when securities transactions are effected on a stock exchange, the Fund's policy is to pay commissions that are considered fair and reasonable without necessarily determining that the lowest possible commissions are paid in all circumstances. The Adviser, Sub-Adviser and Trading Adviser believe that a requirement always to seek the lowest commission cost could impede effective management and preclude the Trading Adviser from obtaining high-quality brokerage and research services. In seeking to determine the reasonableness of brokerage commissions paid in any transaction, the Trading Adviser rely on their experience and knowledge regarding commissions generally charged by various brokers and on their judgment in evaluating the brokerage and research services received from the broker effecting the transaction.

In seeking to implement the Fund's policies, the Trading Adviser conducts trades on behalf of the Fund and effects transactions with brokers and dealers that it believes provide the most favorable prices and are capable of providing efficient executions. The Trading Adviser may face a potential conflict of interest if it were to use client trades to obtain brokerage or research services. This conflict exists because the Trading Adviser is able to use the brokerage or research services to manage client accounts without paying cash for such services, which reduces the Trading Adviser's expenses to the extent that the Trading Adviser would have purchased such products had they not been provided by brokers. Section 28(e) of the Exchange Act permits the Trading Adviser to use brokerage or research services for the benefit of any account it manages. Certain accounts managed by the Trading Adviser may generate soft dollars used to purchase brokerage or research services that ultimately benefit other accounts managed by the Trading Adviser, including the Fund, effectively cross subsidizing the other accounts managed by the Trading Adviser that benefit directly from the product. The Trading Adviser may not necessarily use all of the brokerage or research services in connection with managing a fund whose trades generated the soft dollars used to purchase such products. The Trading Adviser does not currently use Fund assets for, or participate in, third-party soft dollar arrangements or receive proprietary research from full service brokers. The Trading Adviser also does not "pay up" for the value of any such proprietary research. If, in the future, the Trading Adviser were to obtain brokerage and research services from broker-dealers, it would do so in arrangements that are consistent with Section 28(e) of the Exchange Act.

No brokerage commission information is provided since the Fund had not commenced operations prior to the date of this SAI.

SECURITIES LENDING

U.S. Bank, N.A. serves as securities lending agent for the Fund and in that role administers the Fund's securities lending program pursuant to the terms of a Master Securities Lending Agreement entered into between the Fund and U.S. Bank, N.A.

As securities lending agent, U.S. Bank, N.A. is responsible for marketing to approved borrowers available securities from the Fund's portfolio. U.S. Bank, N.A. is responsible for the administration and management of the Fund's securities lending program, including the preparation and execution of a participant agreement with each borrower governing the terms and conditions of any securities loan, ensuring that securities loans are properly coordinated and documented with the Fund's custodian, ensuring that loaned securities are daily valued and that the corresponding required cash collateral of at least 102% of the current market value of the loaned securities is delivered by the borrower(s), using best efforts to obtain additional collateral on the next business day if the value of the collateral falls below the required amount, and arranging for the investment of cash collateral received from borrowers in accordance with the Fund's investment guidelines.

U.S. Bank, N.A. receives as compensation for its services a portion of the amount earned by the Fund for lending securities.

No securities lending information is provided since the Fund had not commenced operations prior to the date of this SAI.

PROXY VOTING PROCEDURES

The Board has delegated the responsibility of voting proxies with respect to the portfolio securities purchased and/or held by the Fund to the Adviser, subject to the Board's continuing oversight. In exercising its voting obligations, the Adviser is guided by its general fiduciary duty to act prudently and in the interest of the Fund. The Adviser will consider factors affecting the value of the Fund's investments and the rights of shareholders in its determination on voting portfolio securities.

The Adviser is responsible for voting all voting securities held by the Fund. To assist in doing so, the Adviser engages the services of a third party proxy processor, currently Institutional Shareholder Services Inc. ("ISS") to evaluate, recommend and vote shares consistent with those recommendations. The Adviser evaluates the summary of ISS voting policies annually in order to assure that they are consistent with the Adviser's views of the long-term interests of the Fund. ISS is provided with holdings information and votes all securities absent some identified conflict; for example, where ISS has a conflict in the vote due to equity ownership in the issuer, where the Fund has a conflict, or where the Adviser otherwise determines that it is important and in the interest of the Fund to vote directly. The ISS proxy policies and procedures are included in Appendix B to this SAI.

More Information

Each year, the Fund will make available the actual voting records relating to portfolio securities held by the Fund during the 12-month period ending June 30 without charge, upon request by calling 1-800-617-0004, or by accessing the SEC's website at www.sec.gov. In addition, a copy of the Adviser's proxy-voting policies and procedures is available by calling 1-800-617-0004 and will be sent within three business days of receipt of a request.

PAYMENTS TO FINANCIAL INTERMEDIARIES

The Adviser, Sub-Adviser and/or their affiliates, at their discretion, may make payments from their own resources and not from Fund assets to affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Fund, their service providers or their respective affiliates, as incentives to help market and promote the Fund and/or in recognition of their distribution, marketing, administrative services, and/or processing support.

These additional payments may be made to financial intermediaries that sell Fund shares or provide services to the Fund, the Distributor or shareholders of the Fund through the financial intermediary's retail distribution channel and/or fund supermarkets. Payments may also be made through the financial intermediary's retirement, qualified tuition, fee-based advisory, wrap fee bank trust, or insurance (e.g., individual or group annuity) programs. These payments may include, but are not limited to, placing the Fund in a financial intermediary's retail distribution channel or on a preferred or recommended fund list; providing business or shareholder financial planning assistance; educating financial intermediary personnel about the Fund; providing access to sales and management representatives of the financial intermediary; promoting sales of Fund shares; providing marketing and educational support; maintaining share balances and/or for sub-accounting, administrative or shareholder transaction processing services. A financial intermediary may perform the services itself or may arrange with a third party to perform the services.

The Adviser, Sub-Adviser, and/or their affiliates may also make payments from their own resources to financial intermediaries for costs associated with the purchase of products or services used in connection with sales and marketing, participation in and/or presentation at conferences or seminars, sales or training programs, client and investor entertainment and other sponsored events. The costs and expenses associated with these efforts may include travel, lodging, sponsorship at educational seminars and conferences, entertainment and meals to the extent permitted by law.

Revenue sharing payments may be negotiated based on a variety of factors, including the level of sales, the amount of Fund assets attributable to investments in the Fund by financial intermediaries' customers, a flat fee or other measures as determined from time to time by the Adviser and/or its affiliates. A significant purpose of these payments is to increase the sales of Fund shares, which in turn may benefit the Adviser through increased fees as Fund assets grow.

GENERAL INFORMATION

Anti-Money Laundering Program

The Fund has established an Anti-Money Laundering Compliance Program (the “Program”) as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (“USA PATRIOT Act”). To ensure compliance with this law, the Fund’s Program provides for the development of internal practices, procedures, and controls, designation of anti-money laundering compliance officers, an ongoing training program, and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that certain of its service providers have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, and conducting a complete and thorough review of all new account applications. The Fund will not transact business with any person or legal entity and beneficial owner, if applicable, whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

Independent Registered Public Accounting Firm

PricewaterhouseCoopers LLP, Two Commerce Square, Suite 1800, 2001 Market Street, Philadelphia, Pennsylvania 19103, is the independent registered public accounting firm of the Fund. The independent registered public accounting firm is responsible for conducting the annual audit of the Fund’s financial statements. The selection of the independent registered public accounting firm is approved annually by the Board.

Transfer Agent

Fund Services, 615 East Michigan Street, Milwaukee, Wisconsin 53202, serves as the Fund’s transfer agent and dividend disbursing agent.

Custodian

U.S. Bank, N.A., 1555 North RiverCenter Drive, Suite 302, Milwaukee, WI 53212, serves as custodian (the “Custodian”) of the Fund’s assets and is responsible for maintaining custody of the Fund’s cash and investments and retaining sub-custodians, including in connection with the custody of foreign securities. Cash held by the Custodian, the amount of which may at times be substantial, is insured by the Federal Deposit Insurance Corporation up to the amount of available insurance coverage limits. The Custodian and Fund Services are affiliates.

Administrator

Fund Services, 615 East Michigan Street, Milwaukee, WI 53202, serves as the administrator (the “Administrator”) and provides various administrative and accounting services necessary for the operations of the Fund. Services provided by the Administrator include facilitating general Fund management; monitoring Fund compliance with federal and state regulations; supervising the maintenance of the Fund’s general ledger, the preparation of the Fund’s financial statements, the determination of NAV, and the payment of dividends and other distributions to shareholders; and preparing specified financial, tax, and other reports. Fund Services and the Custodian are affiliates.

No administration fee information is provided since the Fund had not commenced operations prior to the date of this SAI.

Counsel

Faegre Drinker Biddle & Reath LLP, One Logan Square, Suite 2000, Philadelphia, Pennsylvania 19103-6996, serves as counsel to the Trust.

Registration Statement

This SAI and the Prospectus do not contain all of the information set forth in the Registration Statement the Trust has filed with the SEC. The complete Registration Statement may be obtained from the SEC upon payment of the fee prescribed by SEC rules and regulations. A text-only version of the Registration Statement is available on the SEC's website, www.sec.gov.

FINANCIAL STATEMENTS

Because the Fund had not commenced operations prior to the date of this SAI, there are no financial statements available at this time. Shareholders of the Fund will be informed of the Fund's progress through periodic reports when those reports become available. Financial statements certified by the independent registered public accounting firm will be submitted to shareholders at least annually.

APPENDIX A

DESCRIPTION OF SECURITIES RATINGS

Short-Term Credit Ratings

An *S&P Global Ratings* short-term issue credit rating is generally assigned to those obligations considered short-term in the relevant market. The following summarizes the rating categories used by S&P Global Ratings for short-term issues:

“A-1” – A short-term obligation rated “A-1” is rated in the highest category by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

“A-2” – A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitments on the obligation is satisfactory.

“A-3” – A short-term obligation rated “A-3” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor’s capacity to meet its financial commitments on the obligation.

“B” – A short-term obligation rated “B” is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor’s inadequate capacity to meet its financial commitments.

“C” – A short-term obligation rated “C” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

“D” – A short-term obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring.

Local Currency and Foreign Currency Ratings – S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

“NR” – This indicates that a rating has not been assigned or is no longer assigned.

Moody’s Investors Service (“Moody’s”) short-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Moody’s employs the following designations to indicate the relative repayment ability of rated issuers:

“P-1” – Issuers (or supporting institutions) rated Prime-1 reflect a superior ability to repay short-term obligations.

“P-2” – Issuers (or supporting institutions) rated Prime-2 reflect a strong ability to repay short-term obligations.

“P-3” – Issuers (or supporting institutions) rated Prime-3 reflect an acceptable ability to repay short-term obligations.

“NP” – Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

“NR” – Is assigned to an unrated issuer, obligation and/or program.

Fitch, Inc. / Fitch Ratings Ltd. (“Fitch”) short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-term ratings are assigned to obligations whose initial maturity is viewed as “short-term” based on market convention.¹ Typically, this means up to 13 months for corporate, sovereign, and structured obligations and up to 36 months for obligations in U.S. public finance markets. The following summarizes the rating categories used by Fitch for short-term obligations:

“F1” – Securities possess the highest short-term credit quality. This designation indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

¹ A long-term rating can also be used to rate an issue with short maturity.

“F2” – Securities possess good short-term credit quality. This designation indicates good intrinsic capacity for timely payment of financial commitments.

“F3” – Securities possess fair short-term credit quality. This designation indicates that the intrinsic capacity for timely payment of financial commitments is adequate.

“B” – Securities possess speculative short-term credit quality. This designation indicates minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

“C” – Securities possess high short-term default risk. Default is a real possibility.

“RD” – Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

“D” – Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

“NR” – Is assigned to an issue of a rated issuer that are not and have not been rated.

The **DBRS Morningstar® Ratings Limited (“DBRS Morningstar”)** short-term obligation ratings provide DBRS Morningstar’s opinion on the risk that an issuer will not meet its short-term financial obligations in a timely manner. The obligations rated in this category typically have a term of shorter than one year. The R-1 and R-2 rating categories are further denoted by the subcategories “(high)”, “(middle)”, and “(low)”.

The following summarizes the ratings used by DBRS Morningstar for commercial paper and short-term debt:

“R-1 (high)” – Short-term debt rated “R-1 (high)” is of the highest credit quality. The capacity for the payment of short-term financial obligations as they fall due is exceptionally high. Unlikely to be adversely affected by future events.

“R-1 (middle)” – Short-term debt rated “R-1 (middle)” is of superior credit quality. The capacity for the payment of short-term financial obligations as they fall due is very high. Differs from “R-1 (high)” by a relatively modest degree. Unlikely to be significantly vulnerable to future events.

“R-1 (low)” – Short-term debt rated “R-1 (low)” is of good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favorable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable.

“R-2 (high)” – Short-term debt rated “R-2 (high)” is considered to be at the upper end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events.

“R-2 (middle)” – Short-term debt rated “R-2 (middle)” is considered to be of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events or may be exposed to other factors that could reduce credit quality.

“R-2 (low)” – Short-term debt rated “R-2 (low)” is considered to be at the lower end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events. A number of challenges are present that could affect the issuer’s ability to meet such obligations.

“R-3” – Short-term debt rated “R-3” is considered to be at the lowest end of adequate credit quality. There is a capacity for the payment of short-term financial obligations as they fall due. May be vulnerable to future events, and the certainty of meeting such obligations could be impacted by a variety of developments.

“R-4” – Short-term debt rated “R-4” is considered to be of speculative credit quality. The capacity for the payment of short-term financial obligations as they fall due is uncertain.

“R-5” – Short-term debt rated “R-5” is considered to be of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet short-term financial obligations as they fall due.

“D” – A downgrade to “D” may occur when the issuer has filed under any applicable bankruptcy, insolvency or winding-up statute, or there is a failure to satisfy an obligation after the exhaustion of grace periods. DBRS Morningstar may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Long-Term Issue Credit Ratings

The following summarizes the ratings used by **S&P Global Ratings** for long-term issues:

“AAA” – An obligation rated “AAA” has the highest rating assigned by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is extremely strong.

“AA” – An obligation rated “AA” differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitments on the obligation is very strong.

“A” – An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitments on the obligation is still strong.

“BBB” – An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor’s capacity to meet its financial commitments on the obligation.

“BB,” “B,” “CCC,” “CC” and “C” – Obligations rated “BB,” “B,” “CCC,” “CC” and “C” are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.

“BB” – An obligation rated “BB” is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor’s inadequate capacity to meet its financial commitments on the obligation.

“B” – An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB”, but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitments on the obligation.

“CCC” – An obligation rated “CCC” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

“CC” – An obligation rated “CC” is currently highly vulnerable to nonpayment. The “CC” rating is used when a default has not yet occurred but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

“C” – An obligation rated “C” is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

“D” – An obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within the next five business days in the absence of a stated grace period or within the earlier of the stated grace period or the next 30 calendar days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring

Plus (+) or minus (-) – Ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

“NR” – This indicates that a rating has not been assigned, or is no longer assigned.

Local Currency and Foreign Currency Ratings - S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

Moody’s long-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of eleven months or more. Such ratings reflect both on the likelihood of default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. The following summarizes the ratings used by Moody’s for long-term debt:

“Aaa” – Obligations rated “Aaa” are judged to be of the highest quality, subject to the lowest level of credit risk.

“Aa” – Obligations rated “Aa” are judged to be of high quality and are subject to very low credit risk.

“A” – Obligations rated “A” are judged to be upper-medium grade and are subject to low credit risk.

“Baa” – Obligations rated “Baa” are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

“Ba” – Obligations rated “Ba” are judged to be speculative and are subject to substantial credit risk.

“B” – Obligations rated “B” are considered speculative and are subject to high credit risk.

“Caa” – Obligations rated “Caa” are judged to be speculative of poor standing and are subject to very high credit risk.

“Ca” – Obligations rated “Ca” are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

“C” – Obligations rated “C” are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody’s appends numerical modifiers 1, 2, and 3 to each generic rating classification from “Aa” through “Caa.” The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

“NR” – Is assigned to unrated obligations, obligation and/or program.

The following summarizes long-term ratings used by **Fitch**:

“AAA” – Securities considered to be of the highest credit quality. “AAA” ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

“AA” – Securities considered to be of very high credit quality. “AA” ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

“A” – Securities considered to be of high credit quality. “A” ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

“BBB” – Securities considered to be of good credit quality. “BBB” ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

“BB” – Securities considered to be speculative. “BB” ratings indicates an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

“B” – Securities considered to be highly speculative. “B” ratings indicate that material credit risk is present

“CCC” – A “CCC” rating indicates that substantial credit risk is present.

“CC” – A “CC” rating indicates very high levels of credit risk.

“C” – A “C” rating indicates exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned “RD” or “D” ratings but are instead rated in the “CCC” to “C” rating categories, depending on their recovery prospects and other relevant characteristics. Fitch believes that this approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Plus (+) or minus (-) may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the “AAA” obligation rating category, or to corporate finance obligation ratings in the categories below “CCC”.

“NR” – Is assigned to an unrated issue of a rated issuer.

The **DBRS Morningstar** long-term obligation ratings provide DBRS Morningstar’s opinion on the risk that investors may not be repaid in accordance with the terms under which the long-term obligation was issued. The obligations rated in this category typically have a term of one year or longer. All rating categories from AA to CCC contain subcategories “(high)” and “(low)”. The absence of either a “(high)” or “(low)” designation indicates the rating is in the middle of the category. The following summarizes the ratings used by DBRS Morningstar for long-term debt:

“AAA” – Long-term debt rated “AAA” is of the highest credit quality. The capacity for the payment of financial obligations is exceptionally high and unlikely to be adversely affected by future events.

“AA” – Long-term debt rated “AA” is of superior credit quality. The capacity for the payment of financial obligations is considered high. Credit quality differs from “AAA” only to a small degree. Unlikely to be significantly vulnerable to future events.

“A” – Long-term debt rated “A” is of good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than “AA.” May be vulnerable to future events, but qualifying negative factors are considered manageable.

“BBB” – Long-term debt rated “BBB” is of adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be vulnerable to future events.

“BB” – Long-term debt rated “BB” is of speculative, non-investment grade credit quality. The capacity for the payment of financial obligations is uncertain. Vulnerable to future events.

“B” – Long-term debt rated “B” is of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet financial obligations.

“CCC”, “CC” and “C” – Long-term debt rated in any of these categories is of very highly speculative credit quality. In danger of defaulting on financial obligations. There is little difference between these three categories, although “CC” and “C” ratings are normally applied to obligations that are seen as highly likely to default or subordinated to obligations rated in the “CCC” to “B” range. Obligations in respect of which default has not technically taken place but is considered inevitable may be rated in the “C” category.

“D” – A downgrade to “D” may occur when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods. DBRS Morningstar may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Municipal Note Ratings

An **S&P Global Ratings** U.S. municipal note rating reflects S&P Global Ratings’ opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings’ analysis will review the following considerations:

- Amortization schedule - the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment - the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Municipal Short-Term Note rating symbols are as follows:

“SP-1” – A municipal note rated “SP-1” exhibits a strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

“SP-2” – A municipal note rated “SP-2” exhibits a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

“SP-3” – A municipal note rated “SP-3” exhibits a speculative capacity to pay principal and interest.

“D” – This rating is assigned upon failure to pay the note when due, completion of a distressed debt restructuring, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Moody's uses the global short-term Prime rating scale (listed above under Short-Term Credit Ratings) for commercial paper issued by U.S. municipalities and nonprofits. These commercial paper programs may be backed by external letters of credit or liquidity facilities, or by an issuer's self-liquidity.

For other short-term municipal obligations, Moody's uses one of two other short-term rating scales, the Municipal Investment Grade (“MIG”) and Variable Municipal Investment Grade (“VMIG”) scales provided below.

Moody's uses the MIG scale for U.S. municipal cash flow notes, bond anticipation notes and certain other short-term obligations, which typically mature in three years or less.

MIG Scale

“MIG-1” – This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

“MIG-2” – This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

“MIG-3” – This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

“SG” – This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

“NR” – Is assigned to an unrated obligation, obligation and/or program.

In the case of variable rate demand obligations (“VRDOs”), Moody's assigns both a long-term rating and a short-term payment obligation rating. The long-term rating addresses the issuer's ability to meet scheduled principal and interest payments. The short-term payment obligation rating addresses the ability of the issuer or the liquidity provider to meet any purchase price payment obligation resulting from optional tenders (“on demand”) and/or mandatory tenders of the VRDO. The short-term payment obligation rating uses the VMIG scale. Transitions of VMIG ratings with conditional liquidity support differ from transitions of Prime ratings reflecting the risk that external liquidity support will terminate if the issuer's long-term rating drops below investment grade.

Moody's typically assigns the VMIG rating if the frequency of the payment obligation is less than every three years. If the frequency of the payment obligation is less than three years but the obligation is payable only with remarketing proceeds, the VMIG short-term rating is not assigned and it is denoted as “NR”.

“VMIG-1” – This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections.

“VMIG-2” – This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections.

“VMIG-3” – This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections.

“SG” – This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have a sufficiently strong short-term rating or may lack the structural and/or legal protections.

“NR” – Is assigned to an unrated obligation, obligation and/or program.

About Credit Ratings

An **S&P Global Ratings** issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings' view of the obligor's capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Ratings assigned on **Moody's** global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities.

Fitch's credit ratings are forward-looking opinions on the relative ability of an entity or obligation to meet financial commitments. Issuer Default Ratings (IDRs) are assigned to corporations, sovereign entities, financial institutions such as banks, leasing companies and insurers, and public finance entities (local and regional governments). Issue-level ratings are also assigned and often include an expectation of recovery, which may be notched above or below the issuer-level rating. Issue ratings are assigned to secured and unsecured debt securities, loans, preferred stock and other instruments. Credit ratings are indications of the likelihood of repayment in accordance with the terms of the issuance. In limited cases, Fitch may include additional considerations (i.e., rate to a higher or lower standard than that implied in the obligation's documentation).

DBRS Morningstar offers independent, transparent, and innovative credit analysis to the market. Credit ratings are forward-looking opinions about credit risk that reflect the creditworthiness of an issuer, rated entity, security and/or obligation based on DBRS Morningstar's quantitative and qualitative analysis in accordance with applicable methodologies and criteria. They are meant to provide opinions on relative measures of risk and are not based on expectations of, or meant to predict, any specific default probability. Credit ratings are not statements of fact. DBRS Morningstar issues credit ratings using one or more categories, such as public, private, provisional, final(ized), solicited, or unsolicited. From time to time, credit ratings may also be subject to trends, placed under review, or discontinued. DBRS Morningstar credit ratings are determined by credit rating committees.

1. Routine/Miscellaneous

Approval of Financial Statements

General Recommendation: Generally vote for the approval of financial statements, unless:

- External auditor expressed no opinion, or raised concerns; or
- Statutory auditors/audit committee raised concerns; or
- There are concerns about the financial statements presented or audit procedures used.

Income Allocation

General Recommendation: Generally vote for approval of income allocation, unless:

- Payout ratio is consistently low without adequate justification; or
- Payout ratio is too high, potentially damaging financial health.

Election of Statutory Auditors

General Recommendation: Generally vote for the election of statutory auditors, unless:

- The outside statutory auditor nominee is regarded as non-independent based on [ISS independence criteria](#) for Japan; or
- The outside statutory nominee attended less than 75 percent of meetings of the board of directors or board of statutory auditors during the year under review; or
- The statutory auditor is judged to be responsible for clear mismanagement or shareholder-unfriendly behavior.
- Egregious actions related to a statutory auditor's service on other boards that raise substantial doubt about his or her ability to effectively oversee management and serve the best interests of shareholders at any company.

Audit Firm Appointments

General Recommendation: Generally vote for the appointment of audit firms, unless there are serious concerns related to changing auditors.

2. Election of Directors

Voting on Director Nominees in Uncontested Elections

General Recommendation: ISS has three policies for director elections in Japan: one for companies with a statutory auditor board structure, one for companies with a U.S.-type three committee structure, and one for companies with a board with audit committee structure¹.

1. **At companies with a statutory auditor structure:** vote for the election of directors, except:
 - Top executive(s)² at a company that has underperformed in terms of capital efficiency (i.e., when the company has posted average return on equity (ROE) of less than five percent over the last five fiscal years)³, unless an improvement⁴ is observed;
 - Top executive(s) at a company that allocates a significant portion (20 percent or more) of its net assets to cross-shareholdings⁵;
 - Top executive(s) if the board, after the shareholder meeting, will not include at least two outside directors, and at least one-third of the board members will not be outside directors;
 - Top executive(s) if the board, after the shareholder meeting, will not include at least one female director;
 - Top executive(s) at a company that has a controlling shareholder, unless the board, after the shareholder meeting, will include at least two independent directors and at least one-third of the board members will be independent directors based on ISS independence criteria for Japan;
 - An outside director nominee who attended less than 75 percent of board meetings during the year under review⁶; or
 - Top executive(s) who are responsible for not implementing a shareholder proposal which has received a majority⁷ of votes cast, or not putting a similar proposal on the ballot as a management proposal the following year (with a management recommendation of for), when that proposal is deemed to be in the interest of independent shareholders.
2. **At companies with a U.S.-type three committee structure:** (In addition to the guidelines for companies with a statutory auditor structure) vote for the election of directors, except:
 - Where an outside director nominee is regarded as non-independent based on ISS independence criteria for Japan, and the board, after the shareholder meeting, will not be majority independent; or
 - Where the company has a controlling shareholder, a director nominee sits on the nomination committee and is an insider, or non-independent outsider, unless the board, after the shareholder meeting, will include at least two independent directors and at least one-third of the board members will be independent directors based on ISS independence criteria for Japan.

¹ The director election policy for companies with a board with audit committee structure will be applied to the election of executive directors (applying the policy for inside directors who are not audit committee members) and supervisory directors (applying the policy for outside directors who are audit committee members) at real estate investment trusts (REITs), to the extent that the information necessary to apply the policy is disclosed.

² In most cases, the top executive will be the “shacho” (president). However, there are companies where the decision-making authority also rests with the “kaicho” (chairman of the company) or “daihyo torishimariyaku” (representative director).

³ Exceptions may be considered for cases such as where the top executive has newly joined the company in connection with a bailout or restructuring. This policy will not be applied to companies which have been public for less than five years.

⁴ Improvement is defined as ROE of five percent or greater for the most recent fiscal year.

⁵ Exceptions may be considered for cases such as where the top executive has newly joined the company in connection with a bailout or restructuring.

⁶ The attendance of inside directors is not disclosed in Japan. For companies with a three-committee structure and companies with an audit committee structure, ISS will require attendance of 75 percent or more of audit committee meetings as well as 75 percent or more of board meetings.

⁷ Many Japanese shareholder proposals are submitted as article amendments, which require supermajority support in order to pass.

3. **At companies with a board with audit committee structure:** (In addition to the guidelines for companies with a statutory auditor structure) vote for the election of directors, except:

- Where an outside director nominee who is also nominated as an audit committee member⁸ is regarded as non-independent based on ISS independence criteria for Japan.

Regardless of governance structure, under extraordinary circumstances, vote against individual directors, members of a committee, or the entire board, due to:

- Material failures of governance, stewardship, risk oversight (including, but not limited to, environmental, social, and climate change issues), or fiduciary responsibilities at the company;
- Failure to replace management as appropriate;
- Egregious actions related to a director's service on other boards that raise substantial doubt about his or her ability to effectively oversee management and serve the best interests of shareholders at any company; or
- Failure to take the minimum steps⁹ needed to understand, assess, and mitigate risks related to climate change to the company and the larger economy, for companies that are significant greenhouse gas (GHG) emitters, through their operations or value chain¹⁰.

ISS Independence criteria for Japan

Those outside director candidates falling into any of the following categories should be regarded as non- independent:

- Individuals who work or worked at major shareholders of the company in question;
- Individuals who work or worked at main lenders/banks to the company in question;
- Individuals who work or worked at the lead underwriter(s) of the company in question;
- Individuals who work or worked at business partners of the company in question and the transaction value is material from the recipient's perspective or is not disclosed;
- Individuals who worked at the company's audit firm;
- Individuals who offer or offered professional services such as legal advice, financial advice, tax advice or consulting services to the company in question;
- Individuals who have a relative(s) working at the company in question;
- Individuals who worked at the company in question;

⁸ Outside director nominees who are not nominated as audit committee members are not subject to this policy.

⁹ The following two criteria will be both required to be in alignment with the policy:

- Detailed disclosure of climate-related risks, such as according to the framework established by the Task Force on Climate-related Financial Disclosures (TCFD), including:
 - Board governance measures;
 - Corporate strategy;
 - Risk management analyses; and
 - Metrics and targets.
- Appropriate GHG emissions reduction targets.

At this time, "appropriate GHG emissions reductions targets" will be medium-term GHG reduction targets or Net Zero-by-2050 GHG reduction targets for a company's operations (Scope 1) and electricity use (Scope 2). Targets should cover the vast majority of the company's direct emissions.

¹⁰ Companies defined as "significant GHG emitters" will be those on the current Climate Action 100+ Focus Group list.

- Individuals who work or worked at companies whose shares are held by the company in question as "cross-shareholdings"¹¹; or
- Individuals who have served on the board for 12 years or more^{12, 13}.

Voting on Director Nominees in Contested Elections

General Recommendation: Vote case-by-case on the election of management and shareholder nominees in contested elections, considering the following factors:

- Long-term financial performance of the target company relative to its industry;
- Management's track record;
- Background to the contentious situation;
- Nominee qualifications and any compensatory arrangements;
- Strategic plan of dissident(s) and quality of critique against management;
- Likelihood that the proposed goals and objectives can be achieved (both slates); and
- Stock ownership positions.

These factors will be considered whether the combined number of management and shareholder nominees exceeds the number of available board seats, or whether there are sufficient open seats that all management and shareholder nominees could be elected. In the latter case, the election will still be treated as "contested" if management opposes the election of the shareholder nominees.

¹¹ Traditionally, Japanese companies have often held shares of other companies for reasons other than pure investment purposes, for instance, in order to strengthen a business relationship. Cross-shareholdings here refer not only to mutual shareholdings but also unilateral holdings.

¹² For individuals who had served as statutory auditors until immediately before director appointment, their tenure as statutory auditors will be added in applying this criterion.

¹³ One-year grace period will be applied, and this criterion will be effective as of Feb. 1st, 2026.

3. Article Amendments

Amendments are nearly always bundled together as a single voting resolution, and ISS' general approach is to oppose article amendments as a whole when they include changes ISS opposes. The following are some of the most common or significant types of changes to articles.

Expansion of business activities

General Recommendation: Generally vote for an expansion of business activities, unless a company has performed poorly for several years and seeks business expansion into a risky enterprise unrelated to its core business.

Adoption of a U.S.-style three committee board structure

General Recommendation: Generally vote for the adoption of a U.S. style, three-committee board structure.

Adoption of a board with audit committee structure

General Recommendation: Generally vote for an article amendment to adopt a board with audit committee structure. Vote case-by-case if the board currently has a three-committee structure.

Allow Company to Conduct Virtual Only Shareholder Meetings

General Recommendation: Generally vote against proposals allowing companies to conduct virtual only shareholder meetings. However, if the company specifies in the articles that it intends to hold virtual only meetings only in unusual situations such as the spread of an infectious disease or the occurrence of a natural disaster, vote for the article amendments.

Increase in authorized capital

General Recommendation: Generally vote case-by-case on this request if the company explicitly provides reasons for the increase.

If the company does not provide reasons for the increase, generally vote for proposals to increase authorized capital, unless:

- The increase in authorized capital exceeds 100 percent of the currently authorized capital; or
- The increase leaves the company with less than 30 percent of the proposed authorized capital outstanding; or

- The increase is intended for a poison pill, which ISS opposes.

Creation/modification of preferred shares/class shares

General Recommendation: Generally vote case-by-case on this request.

Repurchase of shares at board's discretion

General Recommendation: Vote case-by-case on article amendments to give the board discretionary authority over share repurchases, taking into account the company's:

- Balance sheet conditions;
- Capital efficiency and return on equity;
- Past share buybacks and dividend payouts;
- Board composition;
- Shareholding structure; and
- Other relevant factors.

Generally vote against these amendments if shareholders will lose the ability to submit shareholder proposals on share repurchases.

Allow company to make rules governing the exercise of shareholders' rights

General Recommendation: Generally vote against this change.

Limit rights of odd shareholders

General Recommendation: Generally vote for this change.

Lower quorum requirement

General Recommendation: Generally vote against this proposal.

WWW.ISSGOVERNANCE.COM

Amendments related to takeover defenses

General Recommendation: Generally vote for this proposal, unless ISS opposes or has opposed the poison pill proposal by itself.

Decrease in maximum board size

General Recommendation: Generally vote for this proposal, unless the decrease eliminates all vacant seats, leaving no flexibility to add shareholder nominees or other outsiders to the board without removing an incumbent director.

Supermajority vote requirement to remove a director

General Recommendation: Generally vote against proposals seeking a supermajority requirement to remove a director.

Reduce directors' term in office from two years to one year

General Recommendation: Generally vote for proposals to reduce a director's term to one year.

Remove language preventing classification of board

General Recommendation: Generally vote against proposals seeking to remove language preventing classified boards.

Creation of Advisory Positions (Sodanyaku or Komon)

General Recommendation: Generally vote against amendments to articles of incorporation to create new advisory positions such as "sodanyaku" or "komon," unless the advisors will serve on the board of directors and thus be accountable to shareholders.

Limitations of liability for directors/statutory auditors

General Recommendation: Generally vote for this proposal.

Limitations of liability for external auditors

General Recommendation: Generally vote against proposals limiting liability for external auditors.

Payment of dividends at the board's discretion

General Recommendation: Generally vote against proposals allowing the board to pay dividends at its discretion. However, if the company employs board with committee structure and the proposal would not eliminate shareholders' ability to submit shareholder proposals on income allocation, vote for the article amendments.

Management buyout related amendments

General Recommendation: Generally vote case-by-case on management related buyout amendments.

WWW.ISSGOVERNANCE.COM

4. Compensation

Annual Bonuses for Directors/Statutory Auditors

General Recommendation: Vote for approval of annual bonuses, unless recipients include those who are judged to be responsible for clear mismanagement or shareholder-unfriendly behavior.

Retirement Bonuses

General Recommendation: Generally vote for approval of retirement bonuses, unless:

- Recipients include outsiders¹²; or
- Neither the individual payments nor the aggregate amount of the payments is disclosed; or
- Recipients include those who are judged to be responsible for clear mismanagement or shareholder-unfriendly behavior.

Special Payments in Connection with Abolition of Retirement Bonus System

General Recommendation: Generally vote for approval of special payments in connection with abolition of retirement bonus system, unless:

- Recipients include outsiders⁹; or
- Neither the individual payments nor the aggregate amount of the payments is disclosed; or
- Recipients include those who are judged to be responsible for clear mismanagement or shareholder-unfriendly behavior.

Stock Option Plans/Deep-Discounted Stock Option Plans

Stock Option Plans

General Recommendation: Generally vote for approval of stock option plans, unless:

- Total dilution from proposed plan(s) and previous option plans exceeds 5 percent for mature companies, or 10 percent for growth companies; or;
- Recipients include individuals who are not in a position to affect the company's stock price, including employees of business partners or unspecified "collaborators;" or
- The maximum number of options that can be issued per year is not disclosed.

¹² However, in rare occasions, ISS may support payment to outsiders on a case-by-case basis, if the individual amount is disclosed and not excessive.

Deep-Discounted Stock Option Plans

General Recommendation: Generally vote for approval of deep-discounted stock option plans¹³, unless:

- Total dilution from proposed plan(s) and previous option plans exceeds 5 percent for mature companies, or 10 percent for growth companies; or
- Recipients include individuals who are not in a position to affect the company's stock price, including employees of business partners or unspecified "collaborators;" or
- The maximum number of options that can be issued per year is not disclosed; or
- No specific performance hurdles are specified (However, if the vesting period before exercise lasts for at least three years, this policy may not apply).

Director Compensation Ceiling

General Recommendation: Generally vote for proposals seeking to increase director fees, if:

- The specific reason(s) for the increase are explained; or
- The company is introducing or increasing a ceiling for performance-based compensation.

Vote case-by-case on proposals seeking to increase director fees, taking into account the company's stock price performance and capital efficiency if:

- The proposals are intended to increase fixed cash compensation or do not specify whether it is fixed or performance-based compensation which will be increased.

Generally vote against proposals seeking to increase director fees if there are serious concerns about corporate malfeasance.

Statutory Auditor Compensation Ceiling

General Recommendation: Generally vote for proposals seeking to increase statutory auditor compensation ceiling, unless statutory auditors are judged to be responsible for clear mismanagement or shareholder-unfriendly behavior.

¹³ The same policy will be applied for "trust type" equity compensation plans, restricted stock plans, performance share plans, and other types of equity compensation plans which have similar economic effect as deep-discounted stock option plans.

5. Share Repurchase Plans

General Recommendation: Vote for the share repurchase plans, unless:

- The proposed repurchase plan exceeds 10 percent of issued share capital without explanation; or
- There are serious concerns about a possible adverse impact on shareholder value.

WWW.ISSGOVERNANCE.COM

14 of 20

6. Takeover Defense Plans (Poison Pills)

General Recommendation: Generally vote against the approval of takeover defense plans (poison pills), unless: (Necessary conditions)

- Independent directors who meet ISS guidelines on attendance comprise a majority of the board after the shareholder meeting;
- The number of independent directors who meet ISS guidelines on attendance is at least two after the shareholder meeting;
- The directors are subject to annual elections;
- The bid evaluation committee is composed entirely of independent directors, or independent statutory auditors, who meet ISS guidelines on attendance;
- The trigger threshold is set at no less than 20 percent of shares outstanding;
- The duration of the poison pill does not exceed three years;
- There are no other protective or entrenchment tools that can serve as takeover defenses, including blocking stakes held by management-friendly shareholders, or setting the maximum board size to the actual board size to eliminate vacant seats, or tightening of procedures for removing a director from office;
- The company posts its proxy circular on the stock exchange website at least four weeks prior to the meeting, to give shareholders sufficient time to study the details of the proposal and question management about them; and
- The pill's total duration¹⁴ does not exceed three years.

(Second stage of analysis, to be applied only when all necessary conditions are met)

- The company has disclosed in its proxy circular specific, credible steps it is taking to address the vulnerability to a takeover by enhancing shareholder value, and explained how the temporary protection afforded by the pill will help accomplish this goal.

¹⁴ The pill's total duration is defined as the sum of the number of years the company has had a pill in place and the number of years the proposed pill will be effective.

7. Mergers & Acquisitions, Third-Party Share Issuances (Private Placements)

For every M&A and Third-Party Placement analysis, ISS reviews publicly available information as of the date of the report and evaluates the merits and drawbacks of the proposed transaction, balancing various and sometimes countervailing factors including:

General Recommendation: Generally vote case-by-case on mergers, acquisitions, and third-party placements, taking into account the following:

- Valuation – Is the value to be received by the target shareholders (or paid by the acquirer) reasonable?
- Market reaction – How has the market responded to the proposed deal? A negative market reaction will cause ISS to scrutinize a deal more closely.
- Strategic rationale – Does the deal make sense strategically? From where is the value derived? Cost and revenue synergies should not be overly aggressive or optimistic, but reasonably achievable. Management should also have a favorable track record of successful integration of historical acquisitions.
- Conflicts of interest – Are insiders benefiting from the transaction disproportionately and inappropriately as compared to non-insider shareholders? ISS will consider whether any special interests may have influenced these directors and officers to support or recommend the merger.
- Governance – Will the combined company have a better or worse governance profile than the current governance profiles of the respective parties to the transaction? If the governance profile is to change for the worse, the burden is on the company to prove that other issues (such as valuation) outweigh any deterioration in governance.

8. Shareholder Proposals

General Recommendation: Vote all shareholder proposals on a case-by-case basis.

Generally vote for proposals that would improve the company's corporate governance or business profile at a reasonable cost.

Generally vote against proposals that limit the company's business activities or capabilities or result in significant costs being incurred with little or no benefit.

WWW.ISSGOVERNANCE.COM

9. Social and Environmental Issues

General Approach

ISS applies a common approach globally to evaluating social and environmental proposals which cover a wide range of topics, including consumer and product safety, environment and energy, labor covered standards and human rights, workplace and board diversity, and corporate political issues. While a variety of factors goes into each analysis, the overall principle guiding all vote recommendations focuses on how the proposal may enhance or protect shareholder value in either the short term or long term.

General Recommendation: Generally vote case-by-case, examining primarily whether implementation of the proposal is likely to enhance or protect shareholder value. The following factors will be considered:

- If the issues presented in the proposal are being appropriately or effectively dealt with through legislation or government regulation;
- If the company has already responded in an appropriate and sufficient manner to the issue(s) raised in the proposal;
- Whether the proposal's request is unduly burdensome (scope or timeframe) or overly prescriptive;
- The company's approach compared with any industry standard practices for addressing the issue(s) raised by the proposal;
- Whether there are significant controversies, fines, penalties, or litigation associated with the company's practices related to the issue(s) raised in the proposal;
- If the proposal requests increased disclosure or greater transparency, whether reasonable and sufficient information is currently available to shareholders from the company or from other publicly available sources; and
- If the proposal requests increased disclosure or greater transparency, whether implementation would reveal proprietary or confidential information that could place the company at a competitive disadvantage.

Say on Climate (SoC) Management Proposals

General Recommendation: Vote case-by-case on management proposals that request shareholders to approve

the company's climate transition action plan¹⁵, taking into account the completeness and rigor of the plan. Information that will be considered where available includes the following:

- The extent to which the company's climate related disclosures are in line with TCFD recommendations and meet other market standards;
- Disclosure of its operational and supply chain GHG emissions (Scopes 1, 2, and 3);
- The completeness and rigor of company's short-, medium-, and long-term targets for reducing operational and supply chain GHG emissions (Scopes 1, 2, and 3 if relevant);
- Whether the company has sought and approved third-party approval that its targets are science-based;
- Whether the company has made a commitment to be "net zero" for operational and supply chain emissions (Scopes 1, 2, and 3) by 2050;
- Whether the company discloses a commitment to report on the implementation of its plan in subsequent years;
- Whether the company's climate data has received third-party assurance;
- Disclosure of how the company's lobbying activities and its capital expenditures align with company strategy;
- Whether there are specific industry decarbonization challenges; and

¹⁵ Variations of this request also include climate transition related ambitions, or commitment to reporting on the implementation of a climate plan.

- The company's related commitment, disclosure, and performance compared to its industry peers.

Say on Climate (SoC) Shareholder Proposals

General Recommendation: Vote case-by-case on shareholder proposals that request the company to disclose a report providing its GHG emissions levels and reduction targets and/or its upcoming/approved climate transition action plan and provide shareholders the opportunity to express approval or disapproval of its GHG emissions reduction plan, taking into account information such as the following:

- The completeness and rigor of the company's climate-related disclosure;
- The company's actual GHG emissions performance;
- Whether the company has been the subject of recent, significant violations, fines, litigation, or controversy related to its GHG emissions; and
- Whether the proposal's request is unduly burdensome (scope or timeframe) or overly prescriptive.

We empower investors and companies to build for long-term and sustainable growth by providing high-quality data, analytics, and insight.
